LCAT-LSCS

LED CONTEMPORARY ARCHITECTURAL TROFFER

Appealing, Adjustable, Accessible

LCAT switchable luminaires offer field adjustability of lumen output and color temperature. Offered in 2 sizes, LCAT offers a wide range of options for classrooms, offices, retail and healthcare applications. Reduce inventory on the shelf, reduce inventory costs and reduce stock outs with switchable luminaires.

Features and Benefits

- Switchable Lumen technology:
 - 2750/3300/4400 lumens (2x2 size)
 - 4200/5200/6000 lumens (2x4 size)
- Switchable CCT technology: 3500/4000/5000K
- High efficiency acrylic center lens features linear prisms for high performance without pixelation
- Appropriate for offices, schools, medical, and public spaces
- High performance reflector with matte white paint standard
- LED modules and electrical accessible from below
- QR code traceability
- Compatible with Dual-Lite inverters

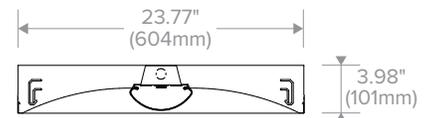

See Certification Specifications

ACCESSORIES (ORDER SEPARATELY)

- FK22 2x2 Single Flange Kit
- FK24 2x4 Single Flange Kit

Ideal for the following applications:

- Commercial Indoor
- Classrooms and Offices
- Halls/Dorms
- Conference Rooms
- Meeting Rooms
- Common Areas

CCL

Center Lens Troffer

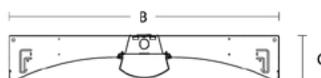

FEATURES

- Switchable Lumen technology:
2800/3200/4100 lumens (2x2 size)
4200/5200/6000 lumens (2x4 size)
- Switchable CCT technology:
3500/4000/5000K
- 80+ CRI
- 0–10V dimming to 10%
- Universal voltage (120–277V)
- 5-Wire flex and EM battery pack available
- Up to 140 lumens per watt

CLT

Center Lens Troffer

The CLT is a low-profile center lens troffer with switchable lumens and CCT designed to blend seamlessly into its environment.

Features and Benefits

- Switchable Lumen technology:
 - 3250/3750/5000 lumens (2x2 size)
 - 3750/5000/6000 lumens (2x4 size)
- Switchable CCT technology: 3500/4000/5000K
- 80+ CRI
- 0-10V 1% Dim to Off driver (standard) provides superior dimming capabilities
- 120-347V, standard
- 5-Wire flex and EM battery pack options available
- Up to 157 lumens per watt

Switchable technology:

Switchable Lumen and Switchable CCT technology allows for easy field-adjustable lighting output with switch located on back of the fixture.

CBT

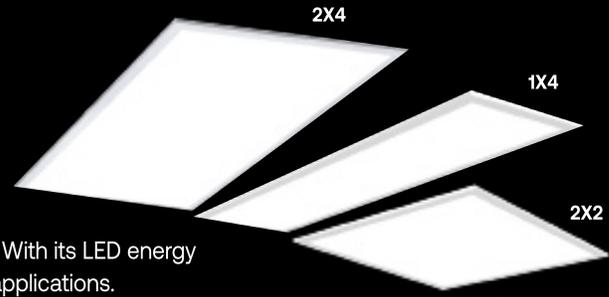

BACK-LIT TROFFER

Affordable, Available, Adjustable

The CBT is an affordable LED lensed troffer with smooth, even illumination. With its LED energy saving technology, CBT is perfect for offices, classrooms and many other applications.

Features and Benefits

- Switchable Lumen technology: 4400/3300/2750 lumens (1x4 and 2x2) 5500/4400/3300 lumens (2x4)
- Switchable CCT technology: 3500/4000/5000K
- 1x4, 2x2, and 2x4 sizes
- 0-10V 1% Dim to Dark driver (standard) provides superior dimming capabilities
- UL Sanitation Certified to NSF 2 Food Equipment standard for non-food zones
- Tested in accordance with ISO 14644-1; suitable for ISO Class 4-9 positive and negative pressure clean rooms
- IC rated
- Back-lit design and frosted lens provides smooth, even illumination across the face of the luminaire
- All CBT LSCS Generation A units are priced as single units and must be ordered as single units. Two packaging options are available

Switchable technology:

Switchable Lumen and Switchable CCT technology allows for easy field-adjustable lighting output with switch located on back of panel.

Can be ordered in single unit (odd number) quantities as this is a factory installed option

ELL14 option uses a 10 watt emergency battery. To determine lumen output in emergency mode, multiply 10w by the fixture lumens per watt (LPW). EX: 10w x 123LPW = 1230 Lumens in Emergency Mode

CBP Gen A fixtures with ELL14 option require a remote mounted test switch, we recommend Dual-Lite PLRTS

LED luminaires

Three LED products that have it all.

- Simple fluorescent replacement
- Readily available in stock
- Affordably priced
- Long-life 60,000 hour LED at L80 lumen maintenance for reduced maintenance on site
- User friendly with access to LED boards and drivers from below
- Modular replacement of components
- Choice of LED color temperature
- Controls compatible
- Familiar shapes, sizes, and appearances for simplicity of use
- Integral battery pack option (1,400 lumens)

LJT Troffer

- Replaces 1, 2, 3 and 4-lamp fluorescent troffers
- Up to 145 lumens per watt
- 1x4 Lumens: 2,255 up to 7,170
- 2x2 Lumens: 1,380 up to 4,715
- 2x4 Lumens: 2,560 up to 9,760
- 3000K, 3500K, 4000K, 5000K
- Recessed, surface, or cable
- Wet location and regressed aluminum door options available
- DLC® (DesignLights Consortium) Qualified, with some Premium Qualified configurations - see www.designlights.org

LAW LED Wraparound

- Replaces 1-lamp and 2-lamp fluorescent wraps
- Up to 128 lumens per watt
- 2' and 4'
- 2' lumens: from 2,685 up to 4,565
- 4' lumens: from 2,406 up to 7,074
- 3000K, 3500K, 4000K, 5000K
- Surface mount or suspended
- Lens hinges from either side for easy installation
- DLC® (DesignLights Consortium) Qualified - see www.designlights.org

LCS LED Striplight

- Replaces 1, 2, 3, 4, or 6-lamp fluorescent strips
- Up to 149 lumens per watt
- 2', 4' and 8'
- 2' Lumens: 3,041
- 4' Lumens: from 2,795 up to 11,334
- 8' Lumens: from 5,590 up to 22,668
- 3000K, 3500K, 4000K, 5000K
- Surface mount or suspended
- Wire guard option

Scaler™

EDGE-LIT
FLAT PANEL

Configurable, Flexible, Efficient

The Scaler™ Panel offers the advantages of edge-lit LED technology in a wide variety of options including color, lumen, driver, emergency batteries, flex, and controls. The flexibility of Scaler helps meet many different lighting needs.

- Four standard colors and color tuning options
- A wide variety of lumen packages available
- IC rated
- 80 CRI
- 120-277V
- Cleanroom suitable
- Multiple driver options
- 5 year warranty

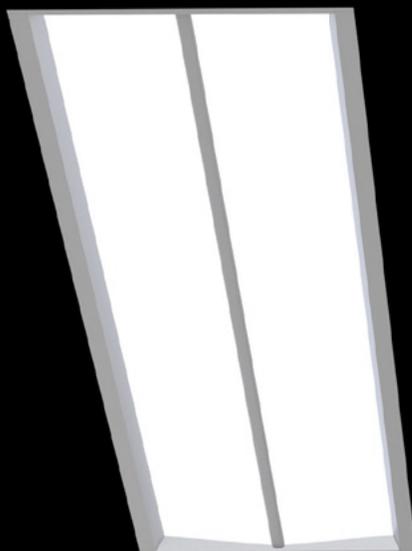

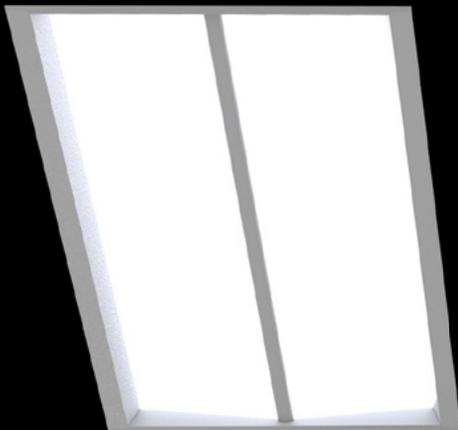

Versify

Versify™ Architectural Edge-Lit balances clean, streamlined architectural elements with high performance, making it the perfect complement to a wide variety of applications. The smooth, even illumination of the edge-lit lens produces a look of continuity across the face of the luminaire with a low glare element. Energy savings are easily achieved with Versify's high lumen per watt performance and optional controls compatibility.

Architectural Aesthetics

A clean, streamlined look available in 1x2, 1x4, 2x2 and 2x4 configurations enables Versify to be used in a variety of spaces.

COLOR TEMPERATURE

MEDIMODE PATIENT BED LIGHT

PRODUCT OVERVIEW

MediMode is a multi-function lighting solution for the patient environment. Twin, indirect optical compartments deliver low-glare illumination for the patient while the center compartment can be activated to deliver an average of 100+ footcandles across the bed surface for critical examinations. An optional full lensed door is available to provide further sealing and to simplify cleaning.

APPLICATIONS

- Patient Rooms
- Pre-and Post-Op Areas
- Emergency Room Examination
- Physician's Examination

PATIENT LIGHT FOR BEHAVIORAL HEALTH SPACES

PRODUCT OVERVIEW

MediMode™ Behavioral provides the primary lighting requirements for the patient environment while addressing the safety and security concerns of behavioral health spaces. The construction is designed to reduce risk of ligature, hiding of contraband, and general damage to the luminaire.

APPLICATIONS

- Behavioral Facilities
- •Addiction Treatment Facilities
- •Emergency Room

OBEX VANDAL / BEHAVIORAL RECESSED AND SURFACE LUMINAIRE

FEATURES

- 2x2, 2x4, and 1x4 recessed fixture for vandal resistant applications.
- (Select configurations and options suitable for behavioral health applications)
- Shallow depth housing (less than 4"), lumen packages up to 25,000 lm+ (2x4)
- Inset and overlap door options, internal symmetric (Lambertian)
- Diffuse, polycarbonate lens options in three thicknesses
- Mounting options for recessed grid, drywall (flange) ceilings and surface mount
- Formed steel housing and door with antimicrobial white painted finish

OBEX SURGICAL RECESSED SURGICAL SUITE LUMINAIRE

FEATURES

- 2x2, 2x4, and 1x4 recessed fixture for surgical suites
- Shallow depth housing (less than 4"), lumen packages up to 25,000 lm+ (2x4)
- Inset and overlap door options, internal symmetric (Lambertian) and asymmetric optics
- Diffuse acrylic lens standard, polycarbonate and tempered glass as options
- Mounting options for recessed grid, drywall (flange) ceilings and surface mount
- Formed steel housing and door with antimicrobial white painted finish

OBEX CLEANROOM RECESSED AND SURFACE CLEANROOM LUMINAIRE

FEATURES

- 2x2, 2x4, and 1x4 recessed fixture for cleanroom applications
- Shallow depth housing (less than 4"), lumen packages up to 25,000 lm+ (2x4)
- Inset and overlap door options, internal symmetric (Lambertian) and asymmetric optics
- Diffuse acrylic lens standard, polycarbonate and tempered glass as options
- Mounting options for recessed grid, drywall (flange) ceilings and surface mount
- Formed steel housing and door with antimicrobial white painted finish

SURGICAL SUITE
Designing to industry certifications along with application suitable construction helps to protect patients and staff during routine and life-saving procedures.

MRI & SCANNING
Proper shielding of electromagnetic interference and non-ferromagnetic construction ensure compatibility with sensitive equipment, resulting in positive patient outcomes.

**VANDAL RESISTANT /
BEHAVIORAL**
Impact and ligature resistant lighting helps deter self-harm and / or injury to others or property.

**CLEANROOM /
FOOD PROCESSING**
Fixtures for these applications not only provide illumination for tasks, but also serve as a barrier between the room and plenum to dirt and contaminants.

MULTIPLE INSTALLATION OPTIONS

Direct Install

The easiest solution for installing in Non-IC new construction or remodel applications.

Traditional Non-IC

The Non-IC plaster frame provides rough-in positioning.

IC Construction

The IC housing provides separation of ceiling insulation from the Fixture Module.

Chicago Plenum

An integrated shroud seals the Fixture Module for use in Chicago Plenum ceilings eliminating the need for a full housing.

PRESCOLITE D2LED

Rediscover why Prescolite's award-winning 2-inch aperture LED recessed family continues to be the perfect solution for the most demanding architectural lighting applications.

DOWNLIGHT

ADJUSTABLE

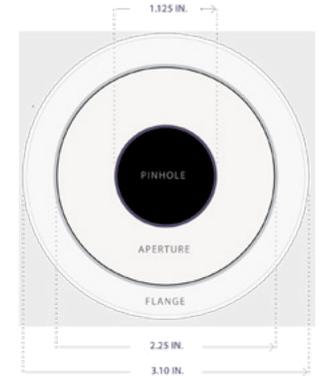

WALL WASH

ACTUAL SIZE

SMALL. SLEEK. SIGNIFICANT

More versatile than ever before, the upgraded and expanded D2 Series provides discreet precision and power for seamless integration into the space.

The small aperture and degree of adjustability all worked in our favor to complement the complex geometries of the architecture while at the same time minimizing glare and delivering comfortable light levels throughout. The finished product is STUNNING."

- Scott Baillie-Hinojosa, Tillotson Design Associates

ON THE COVER:

Roy and Diana Vagelos Education Center
 Tillotson Design Associates, New York City

Prescolite's 2-inch aperture downlights and adjustable luminaires complement the space and the angles of this state-of-the-art medical and graduate education building without interfering or overpowering the architectural atmosphere they create. In this application, the lighting enhances the architect's vision.

The 14-story Study Cascade, the design's centerpiece featuring interconnected staircases and technologically advanced collaboration spaces, is illuminated throughout with Prescolite D2 Series 2-inch LED luminaires.

Established in 1932, the Kurt Versen brand name has always been considered at the pinnacle of style and innovation. Building on this historic reputation the Kurt Versen brand (KV), is re-emerging to once again delight the lighting community with high-quality and innovative architectural products that are designed to solve the unique challenges of today's design community while being trendy and alluring. KV has been reimagined to be visual, inspired, and refreshing. We dare to BE SEEN

CORRECTCUT TECHNOLOGY

Worried about cutting a precise hole for a 1/4" flanged product? That changes today with KV's CorrectCut technology.. KV's housing is the template for the installer. Cut the hole too big? Nope. A downlight that looks just as pretty installed as it does on your conference room table? Yup.

INDUSTRIAL LIGHTING

DESIGN GUIDE

- Light-heavy Manufacturing Environments
- Warehouses
- Cold Storage
- Food Processing Facilities
- Pharmaceutical

INDUSTRIAL LIGHTING APPLICATIONS: WAREHOUSE/LIGHT-MEDIUM MANUFACTURING ENVIROMENTS

ALBEC ABV4 Series LED High Bay Lighting

CONSTRUCTION	Housing:	Combination steel and aluminum
	Lens:	Polycarbonate, Acrylic
	Paint:	Powder coat painted housing No glass in housing or lenses
	Weight:	10-11 lbs (4.55-4.99 kg) per module (use dimensional drawings)
	Optical Assembly:	Polycarbonate reflective optics with optional lens

-30°C to +55°C (-22°F to 131°F)

OPTICAL SYSTEM	Distribution:	Wide, Wide Diffused (reduce Glare), Medium and narrow
	Lumens:	9,000-90,000
	Efficacy:	167-197 LPW typical
	CCT:	3000K, 3500K, 4000L, 5000K
	CRI:	70, 80, & 90

ALBEC ABC Series LED High Bay Luminaire

CONSTRUCTION	Housing:	Metal
	Lens:	Polycarbonate diffused
	Reflector:	White highly reflective polycarbonate
	Paint:	Powder coat painted housing, no glass in housing or lenses
	Weight:	6 lbs (2.7kg) for up to 24k lumen 10 lbs for 30 and 36k lumen 20 lbs for 48k lumen

-30°C to +50°C (-22°F to 122°F) - 18,000lms and below -30°C to +45°C (-22°F to 113°F) for 24,000lms -30°C to +40°C (-22°F to 104°F) for 30,000lms and above

PERFORMANCE	Distribution:	<ul style="list-style-type: none"> • 120°, 90° with open optic • 120°, 90° with diffused lens • 55°, 30° with texture diffused lens, 30k lumen and higher • 120°, 90°, 55°, 30° with clear lens, 30k lumen and higher
	Lumens:	10,000-48,000 lumens
	Efficacy:	4000K, 5000K
	CCT:	14160 LPW typical
	CRI:	70 & 80 CRI

Albeo® PHB Series Selectable Lumen & CCT Linear High Bay

CONSTRUCTION	Housing:	Die-cast Aluminum
	Lens:	Diffused Polycarbonate
	Weight:	Size 1X: 5.0 lbs (2.3 kg) Size 2X: 6.5 lbs (2.9 kg)

1X -40°C to +55°C (-40°F to 131° F)
2X -40°C to +50°C (-40°F to 122° F)

PERFORMANCE	Distribution:	Narrow (55°)**, Medium (90°) and wide (120°)**
	Lumens:	1X: Selectable 15,000 / 18,000 / 24,000 2X: Selectable 27,000 / 30,000 / 36,000
	Efficacy:	Up to 161 LPW
	CCT:	Selectable 4000K / 5000K
	CRI:	80

ALBEC PRC Series LED IP65 Selectable Round High Bay

CONSTRUCTION	Housing:	Die-cast Aluminum
	Lens:	Clear Polycarbonate (90°)
	Paint:	Powder coat painted housing No glass in housing or lenses
	Weight:	6.5-9.5lbs (2.95-4.30kg)
Optical Assembly:	Optimal polycarbonate refractor, drop lens, or aluminum reflector	

With Sensor: -30°C to 50°C Without Sensor: -40°C to 50°C

OPTICAL SYSTEM	Lumens:	1X: Selectable 15,000 / 18,000 / 21,000 2X: Selectable 24,000 / 30,000 / 34,000
	Wattage:	100-240W
	Efficacy:	Up to 160 LPW
	CCT:	Selectable 4000K / 5000k
	CRI:	80
	Glare Rating:	URG<28

CLH-LSCS

Lumen & CCT Switchable Linear High Bay

FEATURES

- Field Switchable lumen and CCT technologies maximize inventory versatility and flexibility
- Two switchable lumen packages with Size 1 ranging between 15,000 to 24,000 and Size 2 ranging from 24,000 to 36,000 lumens. Switch is initially set to the maximum lumen level.
- Field switchable CCT can be either 4000K or 5000K with both CCT's delivering 80 CRI. Switch is initially set to 4000K CCT.

Typical delivered Lumens	Watts	Typical LPW	Max Ambient Temp (°C)
15,000	94.4	159	50°C ¹
18,000	114.8	157	
24,200	158.3	153	
24,000	152.3	158	
30,300	196.8	154	
36,100	242	149	

CRN2

Wet Location High Bay

FEATURES

- Efficient wet location high bay
- Suitable for a variety of areas including warehouses, gyms, covered outdoor areas, garden centers and mezzanines
- Polycarbonate lens with reflector options provide glare reduction and aesthetic customization
- Efficacy up to 144 LPW assures energy savings over traditional high bay luminaires
- Offers lumen packages from 14,000 to 38,000 lms for proper illumination on a variety of high bay applications

Output Version	Ambient Temp Range	Dimming Range
14,000 (LX) 21,000 (MM)	-40° to 55°C	100% to 10%
28,000 (MV) 34,000 (MX)	-40° to 50°C	
38,000 (HM)	-40° to 45°C	

PEL

Peloton™ High Performance Bay

FEATURES

- Uplight options from 1,000 to 4,000 lumens
- 40°C (-40°F) up to 65°C (149°F) ambient operation, see table provided for details
- CSA certified to UL 924 with two emergency battery pack options: 10w and 20w
- Two distribution options available with frosted acrylic and polycarbonate lens materials

Key Data	
Lumen Range	7851-66,210
Wattage Range	48.6-410.2
Efficacy Range (LPW)	146-177
Reported Life (Hours)	L80/60,000

CSL

Striplight

FEATURES

- 4ft and 8ft lengths
- Switchable Lumen Technology
- Switchable CCT, 3500/4000/5000K
- Captive Lens/LED engine assembly
- 80+ CRI
- 0-10V dimming to 10%
- Surface mount on wall or ceiling
- Universal voltage (120-347V)
- Junction box cover included
- Field Installable behind-the-lens microwave sensor accessory

MPS

Multipurpose Linear

FEATURES

- Uniform end-to-end lens brightness with optional continuous row mounting that gives an uninterrupted ribbon of light
- Superior color consistency within a 3-step MacAdam ellipse and greater than 80 CRI
- Available in 2', 4' or 8' lengths
- Optional 90 or 120 min integral emergency battery pack (CEC Title 20 Compliant)
- Curved and flat acrylic and curved polycarbonate lens options or a no lens (NL) version. Wide and Narrow distributions available
- Modular replaceable LED boards and driver accessible for future maintenance or upgrades
- Surface mount, wall mount or suspended mounting

INDUSTRIAL LIGHTING APPLICATIONS: HEAVY MANUFACTURING / AUTOMOTIVE ENVIROMENTS

ALBEC
ABR2 Series
Heavy Industrial High Bay & Low Bay Lighting

CONSTRUCTION	Housing:	Cast A380 Aluminum
	Lens:	Polycarbonate or Glass
	Paint:	Polyester powder coat with passivation layer
	Weight:	21-49lbs (9.53-22.23kg)
	Optical Assembly:	Reflective optics with flat lens

Operating Temperature: -30°C to +65°C

OPTICAL SYSTEM	Distribution:	120°, 90°, 55°, 30°, Glass, Clear PC, and Diffused lens options
	Lumens:	9000-60000
	Efficacy:	Up to 175 LPW
	CCT:	4000K & 5000K
	CRI:	70 & 80

ALBEC
AHH2 Series
Hazardous Location Luminaire

CONSTRUCTION	Housing:	Diecast aluminum
	Lens:	Polycarbonate or glass lens
	Corrosion Resistant Layer:	Polyester powder coat with passivation layer
	Paint:	White
	Weight:	21-49lbs (9.5-22kg)

Operating Temperature: All models: -30°C to +60°C

- UL844 Class 1, Division 2, Groups A,B,C,D.
- UL1598A Inside Drip-proof type (Corrosive "R" Finish)
 - 3,000hrs of ASTM B117 Salt Spray
- NEMA 4X Enclosure Type

PERFORMANCE	Distribution:	120°, 90°, 55°, 30°, Glass, Clear PC and diffused lens
	Lumens:	9,000-60,000 lumens
	Efficacy:	Up to 165 LPW
	CCT:	4000K, 5000K
	CRI:	70 & 80 CRI

ALBEC
PRC Series
LED IP65 Selectable Round High Bay

CONSTRUCTION	Housing:	Die-cast Aluminum
	Lens:	Clear Polycarbonate (90°)
	Paint:	Powder coat painted housing No glass in housing or lenses
	Weight:	6.5-9.5lbs (2.95-4.30kg)
Optical Assembly:	Optimal polycarbonate refractor, drop lens, or aluminum reflector	

With Sensor: -30°C to 50°C Without Sensor: -40°C to 50°C

Albeo®
ALV2 Series
LED Linear Industrial Low Bay

CONSTRUCTION

Housing:	Steel body
Lens:	Polycarbonate diffused
Paint:	White Prepaint No glass in housing or lenses
Weight:	4 ft. – 11lbs max; 8 ft. – 19lbs max

Operating temperature -30°C to +45°C (-22°F to 131° F)

PERFORMANCE

Distribution:	120° Diffused Lens
Lumens:	2,000-16,000 lumens
Efficacy:	Up to 160 LPW
CCT:	3000K, 3500K, 4000K, 5000K
CRI:	80 CRI Standard (90CRI Contact factory for lead-times)

EMBB
Emergency Backup Battery Module LED Accessory

CONSTRUCTION

Housing:	Stamped Metal
Paint:	White
Weight:	2 lbs (0.91 kg)
Optical Assembly:	<ul style="list-style-type: none"> • EBBM lens system enables LEDs to provide optimized illumination for open floor and racked aisles with photometric distributions of 50 and 120 degrees. • Utilizes high brightness LEDs 70 CRI at 5000K CCT typical • LM-79 tests and reports are performed in accordance to IESNA standards

APPLICATIONS OPTICAL SYSTEM

Lumens:	1650lm, 1750lm
Wattage:	Up to 4W
CCT:	4000K & 5000K
CRI:	70

- Designed to meet Life Safety Code NFPA 101 requirements
- Will provide illumination for 90 minutes while in an emergency state
- Recommended for use with the following Albeo fixture families ABC, ABH, ABV, ALC, ALV

INDUSTRIAL LIGHTING APPLICATIONS: HAZARDOUS INDUSTRIAL ENVIROMENTS

Size	Lumen Package	Nominal Lumen Range (DFA LENS)	Nominal watts (Highest)	Lumens/Watt (Highest)	Max Temp
4	ML	4,850-5,350	47	114	40°C
	HL	5,800-6,400	52	123	40°C
	VL	7,350-8,150	68	120	40°C
8	ML	9,700-10,700	94	114	40°C
	HL	11,600-12,800	104	123	40°C
	VL	14,700-16,300	136	120	40°C

Lumens vary according to color temperatures and other factors. See specific photometric test(s). Output levels based on the DFA lens option.

INDUSTRIAL LIGHTING APPLICATIONS: FOOD PROCESSING/CLEANROOM ENVIROMENTS

Columbia
LIGHTING

CRN2-LSCS

Wet Location High Bay

FEATURES

- Switchable lumen and CCT technologies maximize inventory versatility and flexibility
- 120-347V 0-10V driver
- Optional 'plug and play' occupancy sensor is easily installed into the center of the fixture
- Provides lumen packages from 15,500 to 35,040 lumens, allowing for use in a variety of applications including food processing, wash down, warehouses, gyms, garden centers and mezzanines
- Two reflector options deliver glare reduction and aesthetic customization
- Efficacy up to 162 LPW assures energy savings over traditional high bay luminaires

Key Data	
Lumen Range	15,500-35,040
Wattage Range	100-240
Efficacy Range (LPW)	Up to 162
Reported Life (Hours)	L70@50,000

CERTIFICATIONS

- All luminaires are built to UL 1598 standards, and bear appropriate cULus labels for wet locations
- Ambient Operating Temperature range:
- Without Sensor: (Standard) -40°C to 50°C (-40°F to 122°F)
- With Sensor: -30°C to 50°C (-22°F to 122°F)
- IP65 rated
- IK07 impact rated
- NSF Splash Zone 2- food equipment standard for non-food zones rated
- NEMA 250 Type 4X rated

ALBEC

ABN1 Series

LED High Bay Lighting

CONSTRUCTION

Housing:	Cast A360 Aluminum
Lens:	Polycarbonate
Paint:	Powder coat painted housing
Weight:	16lb (7.25kg)
Optical Assembly:	LED optic array with refractive lens

NOTES

- UL 1598 Suitable for Wet Locations (IP65)
- Safety: UL/cUL Listed
- Ratings: NSF SPLASH ZONE rated, IP69K, IP66, NEMA 4X
- Environmental: RoHS compliant
- Packaging: Fixtures are individually packaged

OPTICAL SYSTEM

Distribution:	120°, 90°, or 60°, clear and 120° diffused lens options
Lumens:	9000-28000
Efficacy:	Up to 165 LPW
CCT:	3000K, 3500K, 4000K & 5000K
CRI:	80 & 90

ALBEC

ARC Series

LED IP65 Round High Bay

CONSTRUCTION

Housing:	Die-cast Aluminum
Lens:	Polycarbonate
Paint:	Powder coat painted housing. No glass in housing or lenses
Weight:	6.5-9.5lb (2.95-4.30kg)
Optical Assembly:	85° clear optic, Optional polycarbonate refractor, drop lens, or aluminum reflector.

NOTES

- UL 1598 Suitable for Wet Locations (IP65)
- Emergency battery back-up kit accessory available w(120-277V only)

OPTICAL SYSTEM

Lumens:	13,000-33,600
Wattage:	95-240W
Efficacy:	Up to 140 LPW
CCT:	4000K, 5000K
CRI:	80
Glare Rating:	URG<28

Architectural Downlighting for complex environment

- Five beam distributions allow for controlled illumination with a non-institutional appearance
- 50° cutoff to source and source image provides a low glare, distraction free environment with enhanced visual acuity for intricate tasks
- Options for color temperature range from 2700K-5000K in 80+ or 90+ CRI, as well as an option for Amber (590 nm) support a wide array of applications
- Aluminum anodized reflectors accommodate a wide array of colors and finishes
- Closed cell silicone gasket protects against dust and water ingress supports an IS) 2 cleanroom rating
- Wet location and IP66/IP69K ingress protection ratings allow use in wet environments, including hose down and high temperature, sanitation applications
- Durable, marine grade, die cast aluminum bezel trim (low-copper alloy) with optional antimicrobial paint finish is NSF2 certified
- Flush, 250° thick polycarbonate lens allows for easy wipe down and impedes the accumulation of dirt and organic material

RATIO FAMILY

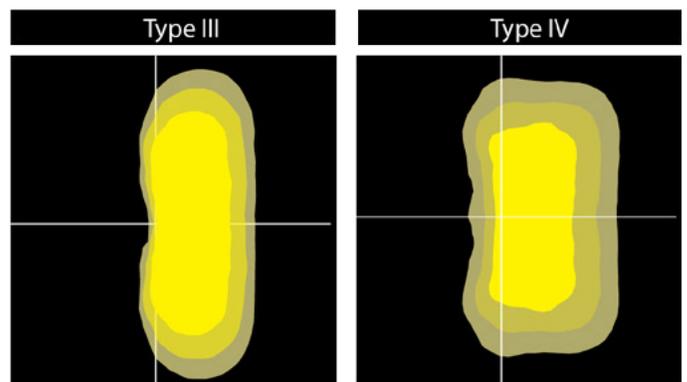

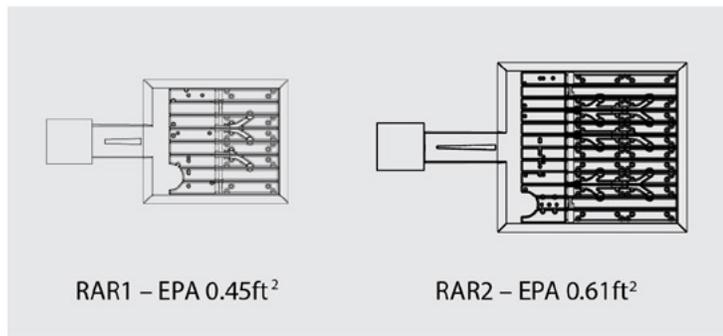

Beacon Lighting provides comprehensive and coordinated solutions for a variety of exterior applications. A full line of luminaires are available with complementing shapes and styles that proportionally scale and add balance to the outdoor environment.

Quality construction and industry leading performance complete the package. Control options featuring photocontrols, occupancy controls and NX Distributed Intelligence™ enable optimum energy savings and customization.

SINGLE CONFIGURATIONS

RATIO

Controls in every applications save energy, extend luminaire life and allow customizable solutions. Scalable control solutions are available cross the entire Ratio family

STANDALONE CONTROLS FUNCTIONALITY

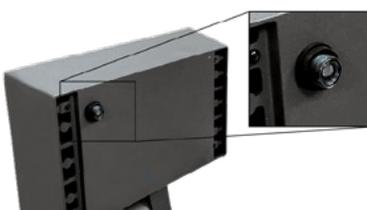

Occupancy Sensor

- Individual fixture control
- Dims product when space is not occupied

Photocontrol

- Individual fixture control
- Turns fixture on when sun sets

INTEGRATED CONTROLS

NX Distributed Intelligence™ platform delivers a lighting control solution capable of seamlessly connecting exterior and interior applications.

- Standalone or networked fixture control
- Astronomical time schedules
- BACnet building networking
- Connects with indoor wired, wireless or hybrid networks
- Wireless setup via app
- Occupancy Sensor option dims product when space is not occupied

7-Pin Receptacle

- Compatible with 3-pin, 5-pin or 7-pin photocontrols
 - Turns fixture on when sun sets, off when sun rises
 - Wireless networked solution
 - For use with a variety of control platforms
- *Additional accessories required

VIPER FAMILY

VERSATILITY

DESIGN

The new Viper includes scalable Area and Flood designs capable of complementing contemporary or traditional architecture. Additional features such as multiple mounting options, replaceable power doors and an IP65 rating are standard offerings in this exceptionally versatile fixture.

PERFORMANCE

Each product is available with a variety of lumen outputs and distributions to satisfy a wide range of applications. Viper's scalability allows us to customize the output to meet specific design criteria. The precise beam control of the Viper helps reduce energy consumption and light trespass while providing high uniformity and visual acuity.

TECHNOLOGY

Simple or dynamic controls are available in every product configuration to give solutions for ever-changing code requirements and additional energy savings

PERFORMANCE

VISUAL COMFORT

The Viper's unique optical design combines visual uniformity with the precise distribution of a Total Internal Reflection (TIR) optic. Five times the luminous surface area provides optimal light distribution plus visual comfort.

BACKLIGHT CONTROL

Less than 12% of the light emitted out of Micro Strike and Strike is thrown behind the pole, meaning 88% is utilized on application. That inherently means less energy is wasted on light that is not being used. For even greater backlight control, additional backlight control shields can be used to limit spill down to 5%.

IES comparison

The Viper Wall is available with three distinct distribution patterns to illuminate a variety of applications. Featuring Micro Strike Optics which maximizes target zone illumination with minimal losses at the house-side, reducing light trespass. In the illustration below, the Viper Wall luminaires illuminate the building perimeter and contribute substantial illumination to the parking area and drive lanes adjacent to the building.

AREA MICRO STRIKE OPTICS

Micro Strike optics are one of the optical choices available in the Viper. These optics have been specifically designed to replace HID luminaires with improved uniformity on application. This, combined with the high lumens per watt, makes Micro Strike the perfect choice for the most common applications.

AREA STRIKE OPTICS

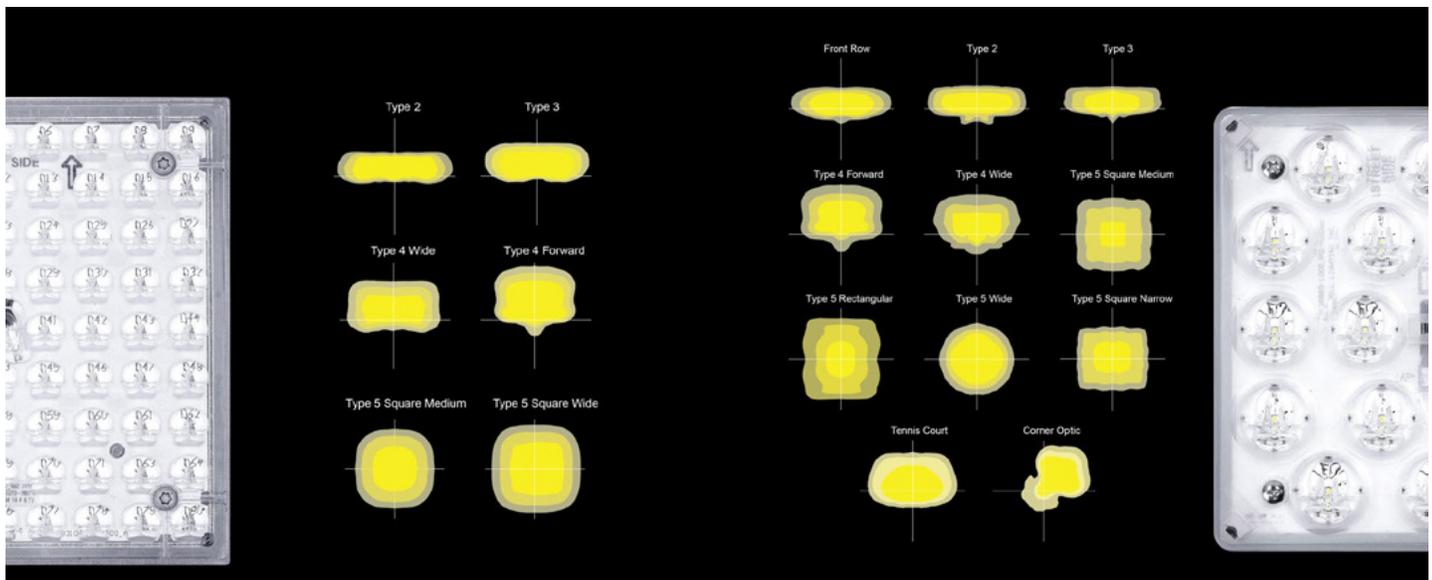

Strike optics are another optic choice that allow for maximized pole spacing, minimal backlight and provide specialty distributions for unique application requirements.

Benefits

- Key distributions for every day applications
- High efficacy and lumens per watt
- Single piece optic provides more visual comfort
- Phosphor converted amber LED option
- Field rotatable for flexibility in mounting orientations
- Backlight control available to reduce light behind the pole

Benefits

- Specialty Distributions for unique applications or specification requirements
- Maximum Fixture Spacing
- Individual optics provide greater optical control
- True amber LED option
- Field rotatable for flexibility in mounting orientations
- Backlight control available to reduce light behind the pole

SPORT FIELD LIGHTING

TURF

SPORTS LIGHTER

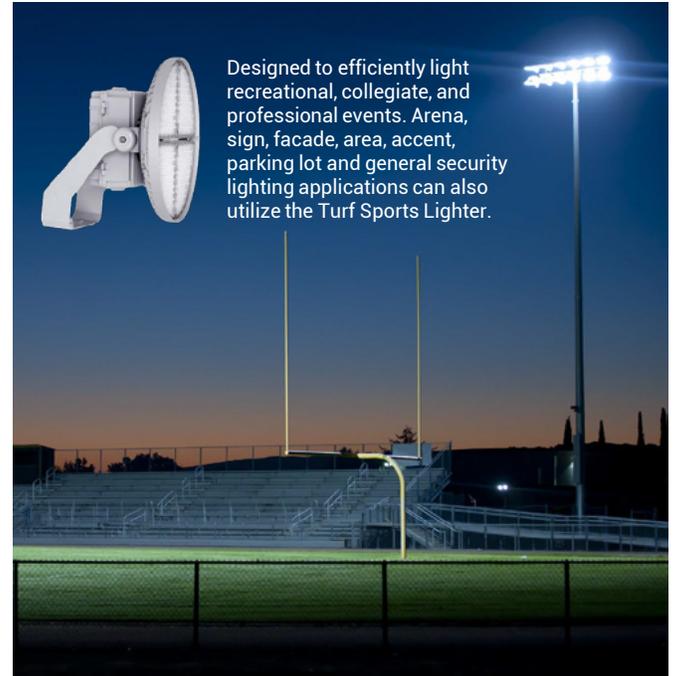

Standard yoke mounting with single 3/4" bolt. Yoke also includes vertical aiming indicators, adjustable in 5 degree increments. Fixture is 3G vibration rated.

Lumen outputs up to 114,000 lumens and 153 LPW give superior performance to legacy products and provide additional energy savings.

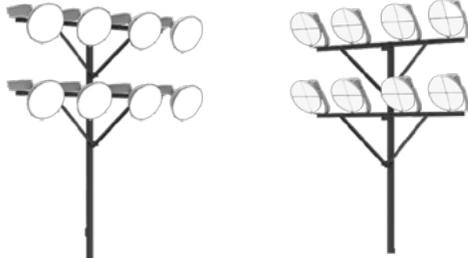

Visor and Laser aiming accessories available and can be field installed.

Current @

Designed to efficiently light recreational, collegiate, and professional events. Arena, sign, facade, area, accent, parking lot and general security lighting applications can also utilize the Turf Sports Lighter.

Retrofit Solution

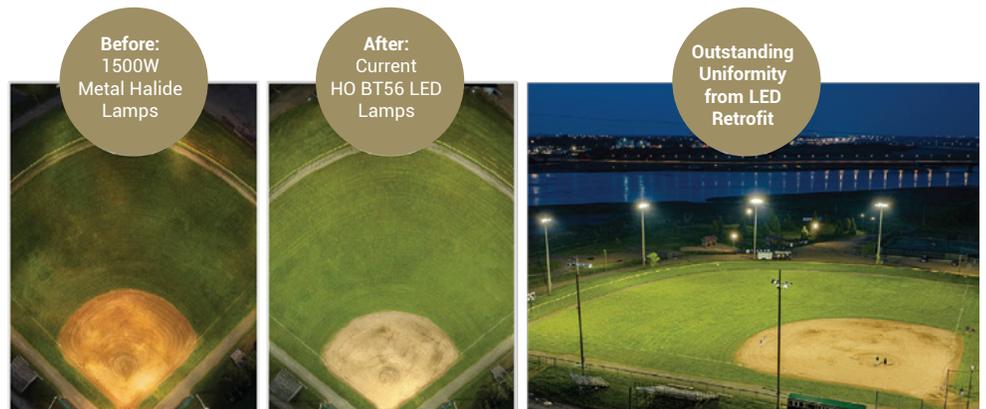

The Turf Sports Lighter is designed to replace 1500W HID products 1 for 1 and even has the capability of reducing fixture count which can result in more than 54% energy savings. This doesn't include additional savings from reduction in maintenance costs and sustained lighting levels. Upgrading your sports lighting has never been so easy!

Nearly three decades ago, Kim Lighting set the bar for parking garage lighting with the introduction of the PGL. This innovative product was the first to offer an integrated, direct/indirect luminaire purposely designed for modern parking garage facilities. This rich legacy of leading edge innovation and performance continues with PGL8. With an Edge-Lit Drop Lens, sleek form and a broad offering of control solutions, Kim Lighting raises the bar again for parking garage illumination.

Lane Delineation for Cyclists
Marked bike lanes along the road are often not enough to keep cyclists safe. Impact bollards prevent motorists from crossing over into the bike lane while making a right turn or using them as parking lanes. Bollards used to delineate lanes requires drivers to sharing the roadway with cyclists and to stay in their own lanes.

Protection for Infrastructure
Impact bollards can be used to protect valuable infrastructure: electrical boxes, telephone switch boxes, water shut off valves, etc., keeping vehicles at safe distance. (Product above specified with RAL 1003 Signal Yellow)

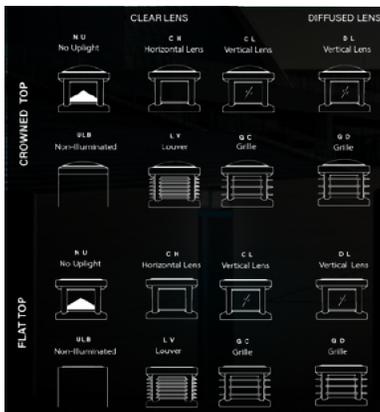

Design

CONSIDERATIONS

Pedestrian Safety
Bollards can help guide traffic in congested areas such as parking lots to define traffic lanes and help the flow of traffic, demark entry and exit points, and provide protection to parking booths. A frequent application is using impact bollards in malls, shopping centers to prevent cars from jumping the curb to protect pedestrians foot traffic.

Traffic Barrier

Closely spaced lines of bollards can form a traffic barrier to separating vehicles from pedestrians, bicycles, wheelchairs, and strollers. Typical applications for parking lot entrance to a stores or malls, and at the intersection where streets have converted to outdoor malls or pedestrian walking ways.

IMPACT RATED

Pavilion can be configured with louvers, grilles or choice of a clear or a diffused vertical lenses for increased vertical illumination with no glare at normal viewing angles and are optimized to deliver class-leading efficacy.

ENGINEERED EXCELLENCE

DECORATIVE PAVILION BOLLARD SLEEVE

6.0" STEEL POST
Provides the strength to resist impact

STRESS BRACKET
Centers the post in the hole allowing even distribution of concrete around the post.

REBARCAGE
Reinforce the concrete

THE PAVILION IMPACT BOLLARD is being offered in two 44" models: non-illuminated (blind) or illuminated. The illuminated version offers all of the options available with the standard Pavilion: six distributions, seven optical options, crowned or flat top, optional RGBW color ring and control option. A matching 44" standard version is available to match the Impact bollard to blend seamlessly with the rest of the project.

CRASH RATED VS. SECURITY
Kim's impact bollard systems are full-scale crash tested by an independent accredited test agency to meet ASTM F3016 and proven safety solutions for stopping a 5,000-lb passenger truck at 10, 20, or 30 mph. These should not be confused with "engineered solutions" where calculations or finite element analyses are performed to estimate the bollard's performance. Full documentation is available showing these bollards have been real-world, dynamically tested to meet the rigorous criteria of ASTM F3016 and will perform as specified.

THE IMPACT BOLLARD

meets the American Society for Testing and Materials (ASTM) S20 rated. The S20 rating from a nominal minimum test velocity of 20 mph with a permissible speed range of 19.0 to 27.4 mph for vehicles weighing up to 5000 pounds. This is the ideal solution for parking lots or walkway applications to protect pedestrians and property from errant vehicle traffic.

DISTRIBUTIONS

PAVILION is an architectural solution for any project that would like to provide safety to pedestrians and Property without the high security look. It can be configured for a wide range of applications:

- pedestrian
- walkways, crosswalks, bike paths, parking
- garages and mall parking lots. Pavilion delivers 5 IES distribution types: I, II, III, IIII
- with house side shield, IV, V

AREA & SITE

EVOLVE® EACL

The EACL expands the range of lumen packages down to 3,000 lumens. It is a cost-effective solution for exterior applications requiring below 20,000 lumens

EVOLVE® EALS

The EALS is ideal for commercial property site-lighting with various mounting options, up to 30,000 lumens and a robust design that allows flexibility.

EVOLVE® EALP

The EALP offers a variety optical and lumen packages, with three color temperatures and multiple mounting options for ultimate application flexibility.

EVOLVE® Sports Lighter (ESPL)

The Evolve ESP LED sports lighter is designed to replace legacy 1500W HID systems one-for-one.

DECORATIVE LED POST TOPS

EVOLVE® EPAM

The Evolve® EPAM Series LED Americana Post Top offers energy efficiency and quality of light in a classic, Acorn look and style.

EVOLVE® EPTT

The Evolve® EPTT Series LED Post Top - Town & Country offers energy efficiency, improved uniformity, and high quality of light with a classic open or refractor style.

EVOLVE® EPST

The Evolve® EPST Series LED Post Top - Salem offers energy efficiency, improved uniformity, and quality of light in a classic, utility carriage look and style.

EVOLVE® EPTC

The Evolve® EPTC Series LED Post Top - Contemporary Twin Support offers energy efficiency, and quality of light in your choice of two distinct, modern styles.

CANOPY & GARAGE

EVOLVE® ECLS

The ECLS offers energy efficiency and quality of light in a sleek low-profile look and style. Ideal for closed ceiling, drive thru and sidewalk applications.

EVOLVE® ECLP

The ECLP offers energy efficiency and quality of light in a sleek low-profile look. Suitable for wet locations, optimized for open canopy applications.

EVOLVE® EG2R

The EG2R features advance LED optic specifically designed for applications such as parking decks, with high uniformity and reduced glare it is ideal for safety.

FLOODLIGHTS

EVOLVE® EFC

The EFC Compact Flood Light is a replacement for 50W to 150W HID general purpose flood luminaires offering significant energy savings with a long-life LED light source.

EVOLVE® EFH

The EFH offers world class performance and durability. Ideal for traditional flood solutions like building facade, billboard, warehouse docks and freight yards.

EVOLVE® EFM

The EFM is our mid-lumen option for flood lighting built for durability. Ideal for general flood lighting and designed to replace up to a 400W HID fixture.

EVOLVE® EFMH

The EFMH is a medium output line of Hazardous Rated flood lights offering world class performance and durability for industrial, indoor or outdoor applications.

EAP1/AREA/SITE/ROAD LIGHTER

- Compact sleek design with multiple lumen output configurations and simple installation
- Field switchable lumens (13,000 - 23,000)
- Field switchable CCT (3000K, 4000K, 5000K)
- Ships with Type 3, Type 4, and Type 5 optics, which can easily be changed in the field
- Mounting options include Arm for Round or Square Pole and Knuckle Slipfitter. Wall mountable with optional accessory
- Field installable occupancy sensor available as an optional accessory
- Default Configuration: 150W, 4000K, Type 3 Distribution

CONSTRUCTION

- Die-cast housing with hidden vertical heat fins that are optimal for heat dissipation while keeping a clean smooth outer surface
- Corrosion resistant, die-cast aluminum housing with powder coat paint finish
- Separate optical and electrical compartment for improved thermal management and optimum component operation
- TGIC thermoset polyester powder paint finish applied at nominal 2.5 mil thickness

OPTICS

- Entire optical aperture illuminates to create a larger luminous surface area resulting in a low glare appearance without sacrificing optical performance
- Ships with Type 3, Type 4, and Type 5 optics, which are easily switchable in the field.
- Field switchable CCT (3000K, 4000K, 5000K)
- Zero uplight at 0 degrees of tilt

INSTALLATION

- Arm mounting with Evolve drill pattern and knuckle capable of rotating upward 30-degrees at 5-degree increments.
- Slipfitter for 2-3/8" OD tenons with built-in knuckle rotatable upward and downward 90-degrees at 5-degree increments.

ELECTRICAL

- Universal 120-347V
- Ambient operating temperature -40°C to 50°C
- Drivers have greater than 90% power factor and less than 20% THD
- LED drivers have output power overvoltage, over-current protection and short circuit protection with auto recovery
- 10KV Surge protection is standard

CONTROL

- 0-10 Volt Dimmable Driver Standard controls

CERTIFICATIONS

- Listed to UL1598 and CSA C22.2#250.0-24 for wet locations
- 3G rated for ANSI C136.31 high vibration applications
- IP65 optical assembly

WARRANTY

- 5 Year warranty

SCALE

WITHOUT WEIGHT

AIRA

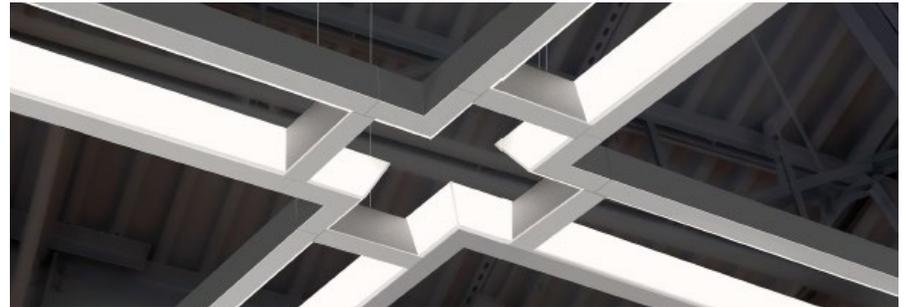

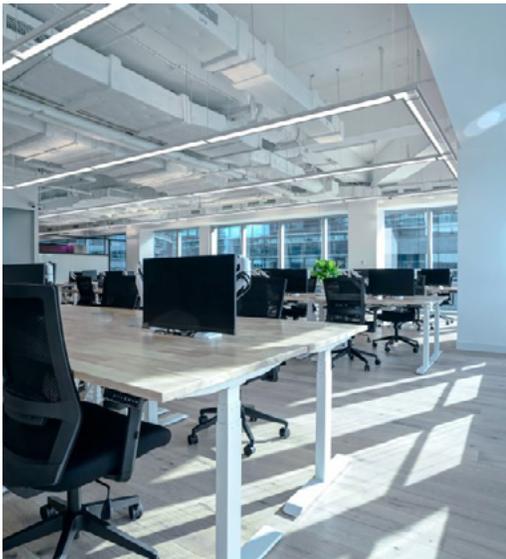

Open Center Luminaire

Elegant from all Angles

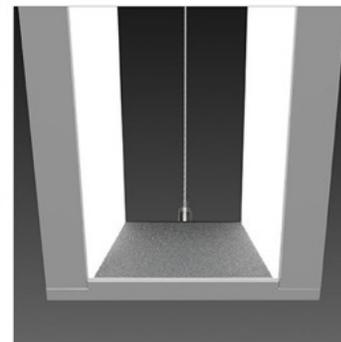

Subtle details define the architectural environment, and subtle details define Aira as well. A clean read of brightness at the leading edge of the extruded rail provides definition. A design detail that helps define the fixture, and therefore your space, as exceptional.

Viewing life from all angles provides a confidence, an understanding. Viewing Aira from all angles provides the same.

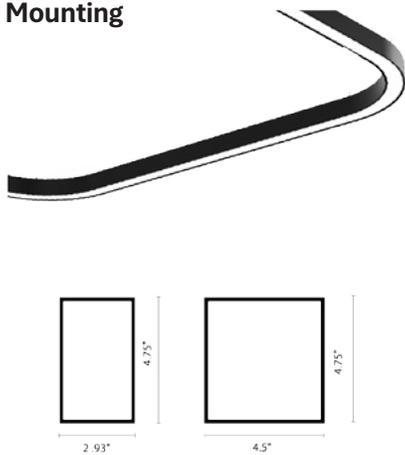

Define your Space

Space definition allows one to interpret the environment. Aira's luminous, open-center system connectors enable this definition without sacrificing the spirit of the luminaire. The flexibility your environment demands, executed with the thoughtfulness Aira demands.

Mounting

Models

The Bend has an infinite amount of custom shapes for standard circular fixtures to add a clean architectural detail to any project. It offers several housing sizes, including 3" or 4" wide apertures, and multiple light distribution options. The Bend fixture not only offers an ultra-thin aircraft cable mounting system, rigid stems and surface mounting, but also a recessed option for varying types of ceiling materials.

SpectraSync™

Color Tuning Technology

SpectraSync™ is an easy and intuitive white tuning solution offered in two modes to accommodate a variety of applications.

Dim to Warm

Dim to Warm mimics the familiar warming effect that occurs with traditional incandescent sources as they are dimmed. (Available with 2200K-3000K)

Tunable White

Tunable White offers users the ability to tailor CCT to their personal preference, enhancing task visibility, material and colors, or the aesthetics of the space. (Available with 2700K-5000K or 2700K-6500K)

HOSPITALITY

Provides flexibility to create multiple environments, whether multi-use spaces, common areas or guest suites.

EDUCATION

Empowers educators to tailor active environments and create a productive academic experience.

OFFICE

Customizes office space for personnel and business needs.

HEALTH & WELLNESS

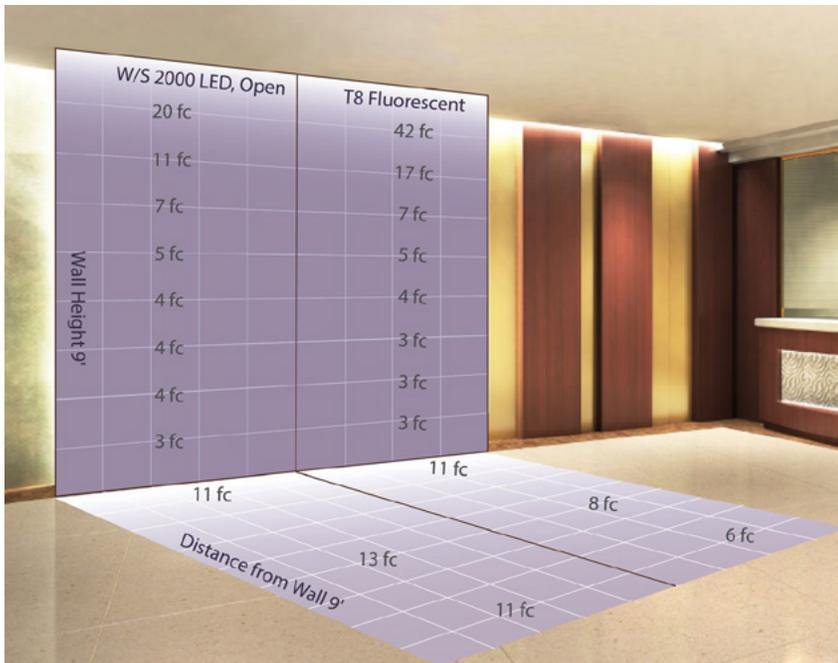

Enhances the well-being of patients while balancing the requirements of the health care provider.

WALL SLOT | 2000 LED

PERFORMANCE

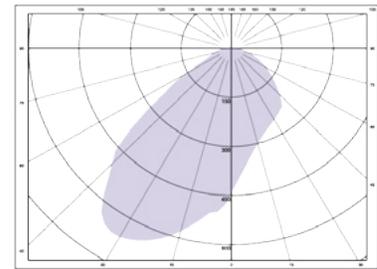

Wall/Slot® 2000 LED delivers 7:1 vertical uniformity; a 50% improvement over conventional sources

Wall/Slot® 2000 LED, Open
Maximizes Efficiency

Typically used where increased perceived brightness at the ceiling plane is advantageous. Examples: Floating ceiling, wayfinding

PRODUCT OVERVIEW

The Obsidian Message Sign provides a reliable method to highlight critical messaging. The high contrast face panel clearly communicates the message in visible red or green letters when the sign is energized. In the Off condition, the face becomes black without any message bleed through - eliminating any confusion. A variety of standard message panels are available upon request.

PATIENT BED LIGHTS

REMEDI™

Multi-function LED Patient Bed Light | Ambient | Reading | Exam

- Addresses the ambient, reading task and examination requirements for the patient bed environment
- Unique, open design reduces the visual impact and overall cross-sectional size while providing the necessary durability
- Four distinct optical compartments eliminate the need to physically manipulate any portion of the luminaire – a time saver for the medical staff and safer for the patient
- Illuminance of 100+ foot-candles on the bed surface with a 5:1 max/min

- Optional full-length, indirect night light with either amber or white LED light source
- Standard antimicrobial finish inhibits the growth of microbes
- Available in 3000K, 3500K and 4000K CCTs

EVEXIA™

Patient Bed Light

- Provides ambient and reading illumination for the patient bed environment
- Clean form reduces visual impact and simplifies routine cleaning
- Durable die cast and extruded aluminum housing
- Standard antimicrobial finish inhibits growth of microbes
- Optional tunable white light for ambient illumination
- Available in 3000K, 3500K and 4000K CCTs

MediMode™

Recessed 2x4 LED Patient Room Ambient | Reading | Exam

- Designed for the varied illumination requirements at the patient bed
- Provides a low-glare, indirect solution for ambient and reading task illumination
- Dedicated compartment delivers illuminance of 100+ foot-candles for the critical examination functions
- Optional full lensed door simplifies cleaning, protects patient from contamination and meets IP65 and UL Sanitation requirements

- Removable service trays for key components simplifies maintenance activities
- Available with integrated low voltage controller to allow control from a patient pillow switch
- Available in both 2x4 and 2x2 models with standard antimicrobial finish that inhibits the growth of microbes
- Available in 3000K, 3500K and 4000K CCTs

NiteWay™

Patient Room LED Night Light

- Optical design limits glare while delivering even illumination on the floor plane
- The smooth form facilitates simple cleaning while the polycarbonate lens and die cast aluminum faceplate provides durability
- Low profile design is available in either a vertical or horizontal orientation
- Standard antimicrobial finish inhibits the growth of microbes on painted surfaces
- Wet location listed
- No exposed fasteners
- Available in 3000K CCTs and amber (590nm)

LiteFrame NSF2

Commercial LED Downlight - NSF2 Splash Zone Rating

- Remote phosphor technology delivers color consistency from fixture to fixture while providing energy savings and lower maintenance costs
- Designed for optimal life and lumen maintenance
- Wide selection of reflector finishes; clear Alzak reflector has anti-microbial finish
- Approved for NSF2 Splash Zone applications
- 0-10V dimming is standard
- Available with 3000K, 3500K and 4000K CCTs and 80 CRI

LTRX

Recessed 2x4 LED Patient Room Light: Ambient/Exam

MALL. SLEEK. SIGNIFICANT.

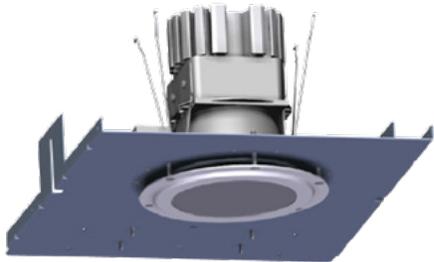

More versatile than ever before, the upgraded and expanded D2 series provides discreet precision and power for seamless integration into the space.

- Designed specifically to provide comfortable ambient and high-level examination illumination
- Standard with 90 CRI with R9>50 for excellent color rendering
- Enclosed lens protects patients against contaminants and simplifies cleaning
- Lens gasket option and wet location listing available
- Available in both 2x4 and 2x2 models with standard antimicrobial finish that inhibits the growth of microbes on painted surfaces
- Available in 3000K, 3500K and 4000K CCTs

LiteFrame IP65

Commercial LED Downlight - IP65 option

- Remote phosphor technology delivers color consistency from fixture to fixture while providing energy savings and lower maintenance costs
- Designed for optimal life and lumen maintenance
- Wide selection of reflector finishes; clear Alzak reflector has anti-microbial finish
- IP65 trim option provides protection from dust and moisture intrusion
- 0-10V dimming is standard
- Available with 3000K, 3500K and 4000K CCTs and 80 CRI

LiteFrame IP65

Commercial LED Downlight - IP65 option

- LED backlit, sand-blasted panels along the edges of the mirror provide even illumination and excellent facial rendering
- Locking feature secures mirror to housing
- The housing comes with a standard antimicrobial paint finish.
- Available in three sizes (18"x40", 24"x40" and 36"x40") and two light outputs
- All models are ADA compliant

CLASSROOM/CORRIDOR/ATTRIUM/LIBRARY ECONOMY SOLUTION - COLUMBIA CBT BACKLIT PANEL

Current®

CBT Back-Lit Troffer

Affordable, Available, Adjustable
The CBT is an affordable LED lensed troffer with smooth, even illumination. With its LED energy saving technology, CBT is perfect for offices, classrooms and many other applications.

FEATURES

- Switchable Lumen technology: 4400/3300/2750 lumens (1x4 and 2x2) 5500/4400/3300 lumens (2x4)
- Switchable CCT technology: 3500/4000/5000K
- 1x4, 2x2, and 2x4 sizes
- 0-10V 1% Dim to Off driver (standard) provides superior dimming capabilities
- Tested in accordance with ISO 14644-1; suitable for ISO Class 4-9 positive and negative pressure clean rooms
- IC rated
- Back-lit design and frosted lens provides smooth, even illumination across the face of the luminaire
- All CBT LSCS Generation A units are priced as single units and must be ordered as single units. Two packaging options are available

Switchable technology:
Switchable Lumen and Switchable CCT Technology allows for easy field-adjustable lighting output with switch located on back of panel.

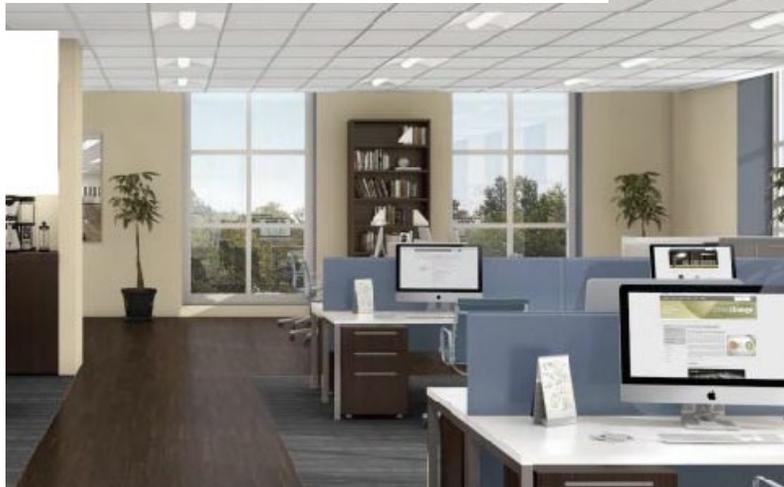

CLASSROOM/CORRIDOR/ATTRIUM/LIBRARY

VOLUMETRIC TROFFER SOLUTION

LCAT-LSCS

LED Contemporary Architectural troffer

1'x2'
A small scale, attractive option for corridors, conference rooms, reception desks and architectural insets.

1'x4'
This sleek shape integrates seamlessly into architectural designs.

2'x2'
Add quiet elegance to commercial spaces with the simplicity and modularity of this popular form.

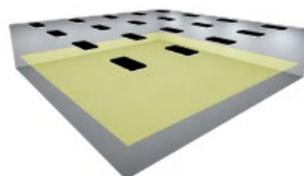

2'x4'
Replace existing luminaires or design for new installations with this appealing, graceful architectural troffer.

Stack/Aisle Distribution

FEATURES

- Three photometric distributions: Medium, Narrow and Aisle/Stack
- Available in 4' or 8' standard lengths
- Optional integral emergency battery pack for backup-required applications
- Uninterrupted ribbon of light for single or row mount applications
- Optional SpectraSync™ offers two modes of tunable white solutions and integrates seamlessly into a variety of control systems
- NX Lighting Controls provides options for standalone and networked integrated sensor with wired or wireless connectivity for NX system deployments

Light Delivered Exactly Where You Need It

With its medium, narrow and aisle/stack distribution options, Reverie offers lighting solutions for a variety of spaces. Optional uplight, available up to 4,000 lumens, removes "the cave effect" by pleasantly illuminating your ceilings.

Medium Distribution

- Mid-range, diffused path of light
- General lighting
 - Work spaces

Narrow Distribution

- Concentrated channel of light
- Auto service areas
 - Manufacturing stations

Stack/Aisle Distribution

- Bidirectional paths of light
- Library bookshelves
 - Store aisles

SPORT FIELD LIGHTING

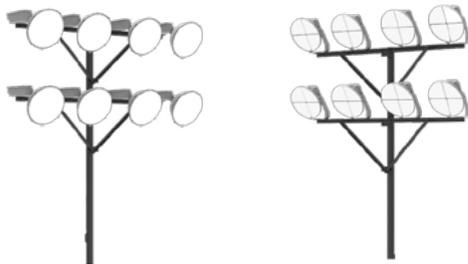

Standard yoke mounting with single 3/4" bolt. Yoke also includes vertical aiming indicators, adjustable in 5 degree increments. Fixture is 3G vibration rated.

Lumen outputs up to 114,000 lumens and 153 LPW give superior performance to legacy products and provide additional energy savings.

Visor and Laser aiming accessories available and can be field installed.

Retrofit Solution

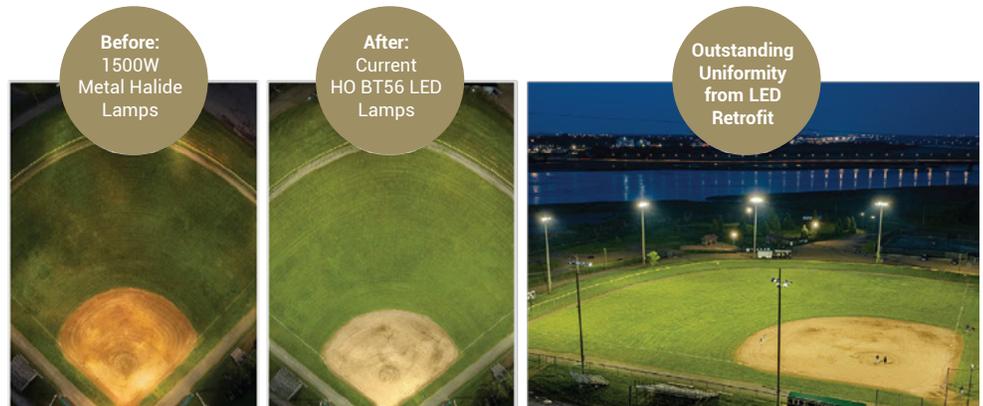

The Turf Sports Lighter is designed to replace 1500W HID products 1 for 1 and even has the capability of reducing fixture count which can result in more than 54% energy savings. This doesn't include additional savings from reduction in maintenance costs and sustained lighting levels. Upgrading your sports lighting has never been so easy!

System Overview

Current @

ONE SYSTEM WIRED AND WIRELESS

Inside and Out

INDOOR & OUTDOOR DEPLOYMENT

Single System for any commercial site spanning indoor and outdoor applications

CONNECTED LIGHTING PORTFOLIO

Broad offering of NX Enabled Luminaires that simplify installation and system costs

INTELLIGENCE IS IN OUR DNA

Utilizes a Distributed Network Architecture (DNA) to eliminate single point of failure to deliver unmatched reliability and scalability

SITE MANAGEMENT

NX Network provides single user interface for system maintenance and configuration

BUILDING INTEGRATION

The NX system is BTL certified ensuring a seamless experience with existing building management systems

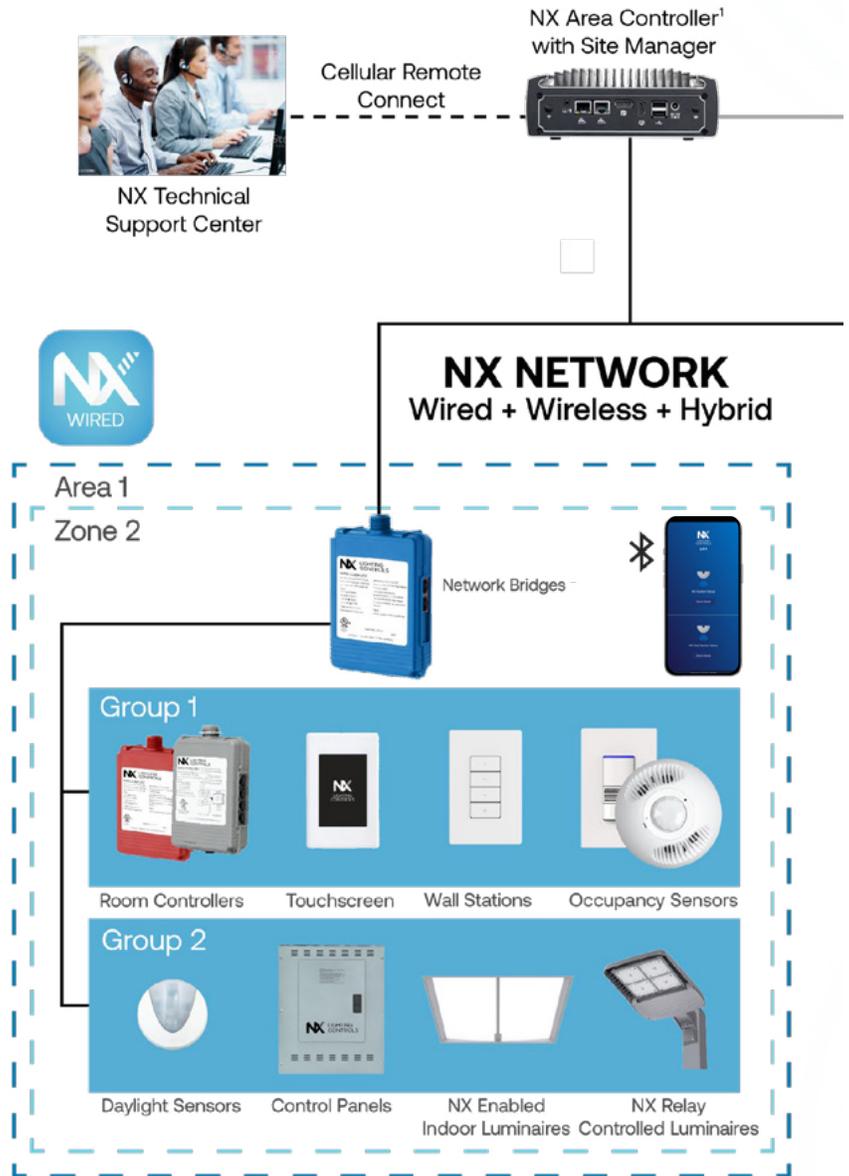

Building Blocks

NX System Overview

The NX Lighting Controls System provides all the building blocks necessary for a secure, on-premise enterprise lighting management system. The system not only controls lighting, but also provides actionable information to Building Owners and Facility Managers to create energy efficient spaces and improve occupant experience.

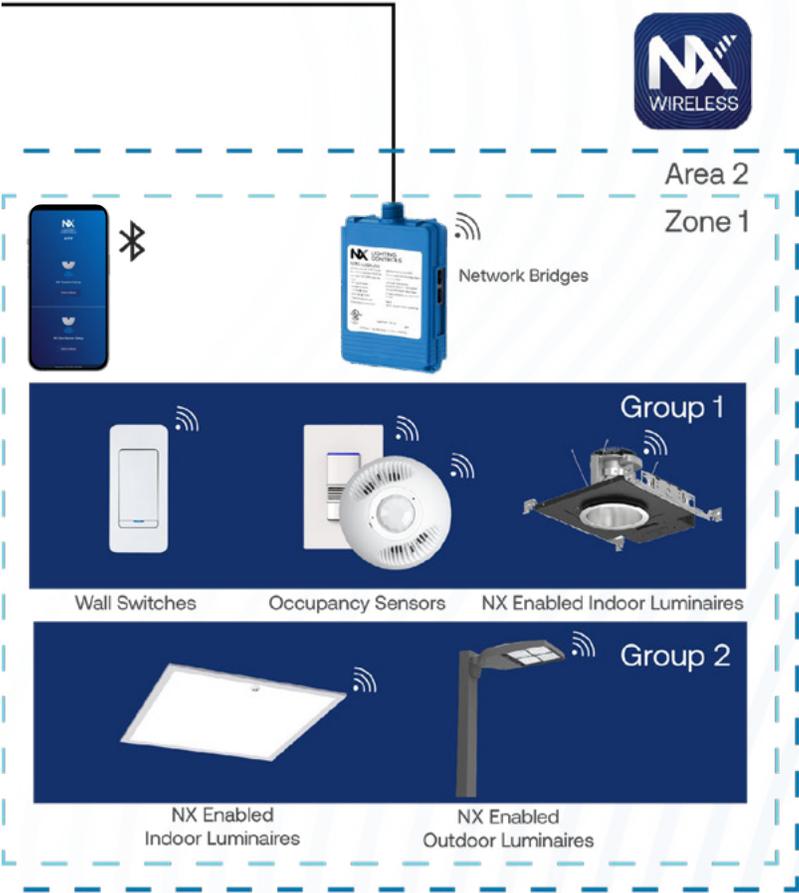

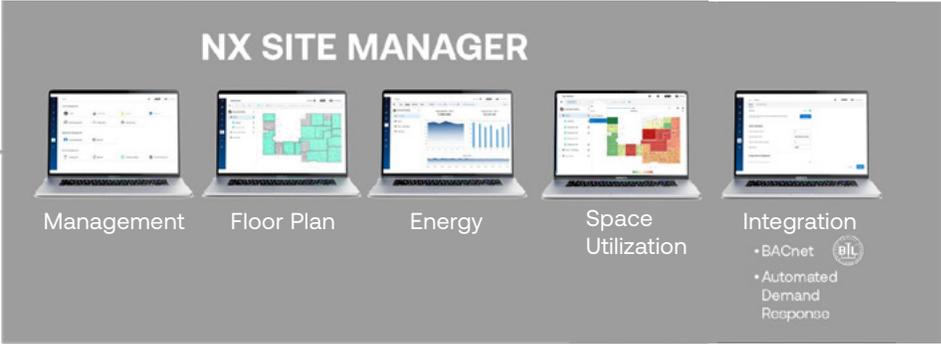

NX LIGHTING CONTROL SYSTEM

- Network of device and luminaires organized by Areas / Zones / Groups (AZG)
- NX wired & wireless devices and connected luminaires control lighting using relays and 0-10V dimming
- Wired devices connect using CAT5 cables and provide auto-configuration for basic code compliance
- Wireless devices are grouped together and communicate using secure AES 128-bit encrypted 2.4GHz wireless mesh technology based on the IEEE 802.15.4 standard. Network bridges manage NX Zones and connect wired and wireless zones to the NX Network
- NX Lighting Controls mobile app provides simple tool for quick device and system adjustments
- The NX Area Controller with Site Manager provides Building Owners & Facility Managers with multi-building lighting control, insights into their lighting system, and integration with Building Management Systems (BMS)

PLATFORM SNAPSHOT

Space Type	Architecture	Deployment	Connectivity	Integration Options	Advance Solutions
Interior & Exterior	Distributed	Standalone & Network	Wired, Wireless, Hybrid	Contacts, BACnet™, OpenADR 2.0a/2.0b	SpectraSync™

SITE MANAGER

- Intuitive web-based, comprehensive lighting management console
- Manage lighting schedules
- Space Utilization Application (Optional)
- Graphically view how spaces are being occupied within a facility over a timeline
- Quickly respond to requests for light level changes or reported issues from floor plan views
- Visual insights into energy usage
- Integrate the lighting system to any BACnet compatible Building Management System (BMS)

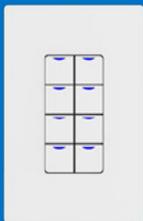

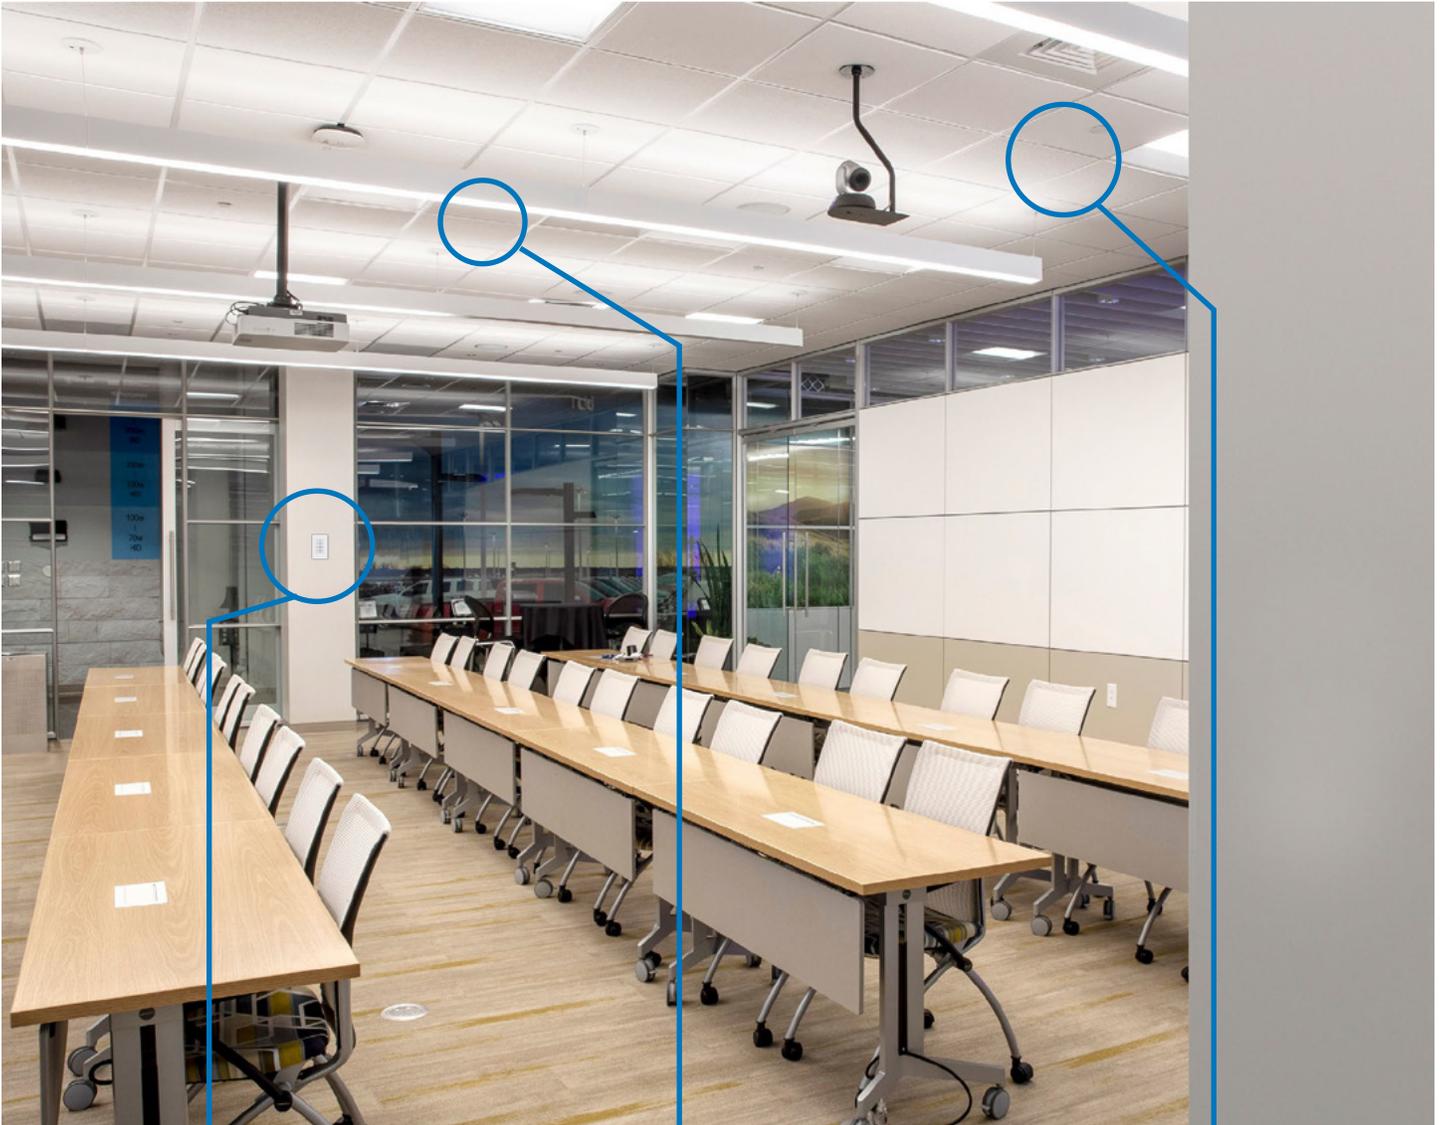

¹ Supports up to 1,000 NX Devices, Additional NXAC2 Site Manager Adapters (not shown) have the ability to expand the NX Network by supporting up to 1,000 additional NX Devices each.

Room Control

Wired Solution

The NX Lighting Controls wired room control is a fully distributed digital lighting control solution for standalone and networked applications. With a plug-and-play auto-configuration feature using CAT5 connections NX delivers a quick and simple means to reduce installation time, meet code, and enable manual, daylight or scheduled based control at the room level.

NX
Wall Switch

NX OMNI
Ceiling Sensor

NX Room Controller

ROOM CONTROLLERS

- Real-time clock for scheduling at room control level
- Power metering
- Intelligent auto-configuration with device automatic code compliance
- CAT5 plug-and-play connectivity
- UL924 emergency solutions

SENSORS

- Passive Infrared, Ultrasonic & Dual Technology
- CAT5 plug-and-play connectivity
- Integrated 2.4GHz wireless mesh and bluetooth radio for easy commissioning & communication
- IntelliSCOPE™ compatible for real-time sensitivity reading and adjustment
- Indoor and outdoor daylight sensors

WALL SWITCHES

- Clean, unobtrusive & enduring design
- Smart Switches available in 1, 2, 3, 4, 5, 6, 8, and key switch versions
- Specialty versions available for out-of-box programming
- Offered in White, Gray, Black, Ivory, Light Almond, and Red
- Custom laser engraved buttons available for NX Smart Switches
- NX SimpleTouch single gang touch screen

INTERFACES

- Allow third party devices to digitally interface with the NX System
- Supports RS232 serial communications
- Supports A/V, dry contact outputs & inputs as well as HVAC options
- Enables Bluetooth commissioning with real-time clock option
- Wireless Radio interface with 2.4GHz mesh capabilities for NX Network communication

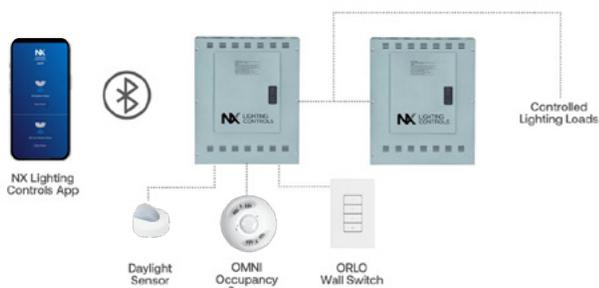

NXP2 Panel

Wired Solution

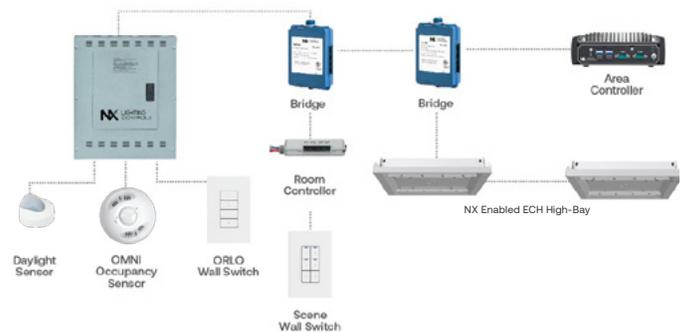

The NX Lighting Control Panel (NXP2 Series) is a robust and reliable panel that can operate as a standalone or networked NX solution. The NX Panel meets all applicable code and energy requirements, is fully scalable, quick to install, and easy to program from the NX Lighting Controls mobile app.

Single & Multiple Panel Configurations

Networked Panel Deployment

LIGHTING CONTROL PANELS

- Available in 8, 16, 24, 32 and 48 relay panel sizes
- Matching number of relays and dimming channels
- Programmable using Bluetooth® NX Lighting Controls mobile app using NXBT1 (included)
- Optional factory installed UL924 emergency control
- Contractor friendly installation and configuration

RELAYS

- Robust mechanically latching single and double pole relays
- Electrically rated for 60,000+ operations (30,000+ cycles) at full 20A load
- Mechanically rated for 120,000+ operations (60,000+ cycles)
- Manual override switch integral to relay
- At-A-Glance ON/OFF relay status indicator

WALL SWITCHES

- Clean, unobtrusive & enduring design
- Smart Switches available in 1, 2, 3, 4, 5, 6, 8, and key switch versions
- Specialty versions available for out-of-box programming
- Offered in White, Gray, Black, Ivory, Light Almond, and Red
- Custom laser engraved buttons available for NX Smart Switches
- NX SimpleTouch single gang touch screen

SENSORS

- Passive Infrared, Ultrasonic & Dual Technology
- CAT5 plug-and-play connectivity
- Integrated 2.4GHz wireless mesh and bluetooth radio for easy commissioning & communication
- IntelliSCOPE™ compatible for real-time sensitivity reading and adjustment
- Indoor and outdoor daylight sensors

Connected Lighting - Indoor

Wireless and Wired Solutions

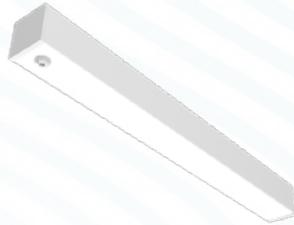

NX Lighting Controls offers a broad portfolio of wireless control devices and enabled luminaires to create seamless scalable solutions from a single room to a complete networked campus.

With the removal of wires and simple programming through mobile app or enterprise software, NX Wireless delivers design simplicity, reduced installation time and low-cost code compliance for both retrofit and new construction.

NX Networking

Building and Site Networking

The NX Networked devices provide a simplistic approach to networked lighting controls that are cost-effective and flexible for diverse applications. NX Network devices seamlessly connect across both indoor and outdoor applications through wired, wireless, or hybrid deployments.

NX Area Controller

NX PoE Switch

NX Bridge

NX AREA CONTROLLER

- On-premise solid state controller with Intel I7 CPU, 16GB Memory, and 500GB SSD
- Multi-layer network security and access control (ioXt Certified)
- Integrates NX Lighting Control System with Building Management Systems (BMS) via BACnet IP interface (BTL Listed)
- Integrated remote connection provides access to NX customer support team assistance
- Supports up to 1,000 NX devices
- DIN rail mounting (DIN rail kit included)

POE SWITCH

- Expands NX Network into 7 segments
- Each port is powered and can supply DC power to connected NX Bridges
- 24V AC/DC power supply included

NX BRIDGE

- Connects individual Zone Segments to main NX Network Segment
- Serves as a repeater to extend the NX Network Segment
- Connects Wired and Wireless Zones
- Multiple bridges can be connected to extend the number of devices in a Zone Segment
- Built-in time clock keeps zone devices and schedules synchronized

MEDIA CONVERTER

- Provides ability to extend NX Network across large distances (up to 5km between media converter devices)
- Enables NX Network to span separate buildings with different ground planes
- Multi-mode operation supports copper CAT5 and fiber connections

Standalone Controls

Broad selection of devices to meet your project needs

OMNI CEILING MOUNT OCCUPANCY SENSOR

- PIR, Ultrasonic & Dual Technology options
- Proprietary IntelliDAPT® Technology
- 500 – 2000 sqft coverage
- Line and low-voltage versions

LIGHTOWL WALL MOUNT OCCUPANCY SENSOR

- PIR, Ultrasonic & Dual Technology options
- Proprietary IntelliDAPT Technology
- 450 – 1600 sqft coverage
- Wide View, High Bay and Outdoor versions

LIGHTHAWK WALL SWITCH OCCUPANCY SENSOR

- PIR, Ultrasonic & Dual Tech Options
- Proprietary IntelliDAPT Technology
- 400 – 1000 sqft coverage
- Single & Dual Circuit Control
- RhinoTuff vandal resistant lens
- Line and low-voltage versions

WASP FIXTURE MOUNT SENSOR

- On/Off Control & 0-10V Dimming
- Integrated photocell for daylight harvesting applications
- Lens options for Low to High Bay applications
- Available in surface mount and end mount options
- Line and low-voltage versions

BLUETOOTH WASP FIXTURE MOUNT SENSOR

- On/Off Control & 0-10V Dimming
- Bluetooth programming via NX Lighting Controls App
- Tri-level set points
- IntelliSCOPE™ for real-time occupancy data
- Integrated photocell for daylight harvesting applications
- Multiple Lens Options for Low to High Bay Applications
- Line and low-voltage versions

BLUETOOTH SMP FIXTURE MOUNT SENSOR

- 0-10V dimming with dim-to-off driver
- Bluetooth programming via NX Lighting Controls App
- High and Low mount sensor options
- Multiple form factors and coverage patterns
- IntelliSCOPE™ for real-time occupancy data
- Photocell for daylight harvesting applications

NX CONNECT

- Simple room-based wireless controls programmed from the NX Connect mobile app
- In-Fixture wireless sensor options
- Single, dual, or three group wireless room controllers
- Battery Operated wireless ceiling mount occupancy and daylight sensor
- Battery Operated wireless switches and a self-powered wireless rocker switch

EMERGENCY DEVICES

- Automatic Load Control Relays
- Dual Voltage, 120V or 277V operation
- Provision for remote test button or fire alarm interface
- UL1008 Branch Circuit Transfer Relay
- Works with both inverter and generator systems
- Attractive Flush Mount Emergency Remote Test Button
- Low Voltage Class 2 Device

DAYLIGHT SENSORS

- Open Loop and Closed Loop photo sensors
- Foot-candle range: 3 – 6,000 fc
- Indoor and outdoor versions
- Low-profile design

CX LIGHTING CONTROLS PANEL

- Compact single enclosure with multiple size offerings for flexible and cost-effective installation
- Astronomical and real time clock for scheduling
- LCD user interface with keypad for easy and intuitive programming
- Allows for connection of low voltage devices directly to panel without any ancillary parts

WALLBOX DIMMERS

- Standalone Switch
- Full Range dimming
- Separate On/Off
- Single & 3-Way
- 120/277V Dimming Options

LOW VOLTAGE SWITCHES

- Standalone Switch
- On/Off and Dimming Versions
- 1-4 Button options
- Latching & Momentary options
- 24 VDC

LED Lamps - Tubes

LED Tubes, sometimes referred to as "TLEDs," are meant to use linear fluorescent sockets and fixtures. LED Tubes have the same length and pins as the linear fluorescent lamps they are intended to replace. The details of how the fixture is wired and the auxiliary equipment used may vary, depending on the LED Tube solution.

The lighting industry refers to three basic Types of LED Tubes:

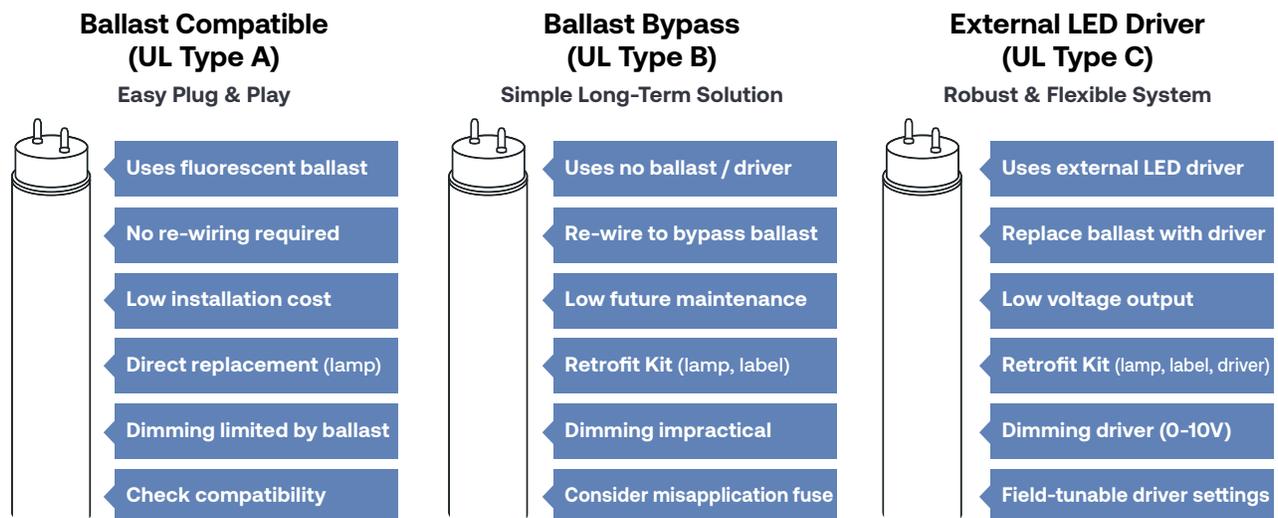

- **Type A LED Tubes** are intended to be used as direct replacements for linear fluorescent lamps, with no modification to the fixture. Type A LED Tubes operate from fluorescent ballasts.
- **Type B LED Tubes** operate from mains voltage. The ballast is bypassed and the fixture is re-wired according to the installation instructions that come with the lamp. Wiring may vary across Type B LED Tubes from different manufacturers. A retrofit fixture label indicating the LED Tube used and that the fixture has been re-wired is provided to be applied to the fixture.
- **Type C LED Tubes** operate from dedicated remote (external) LED drivers. Instead of a ballast, a remote driver is used to provide the proper voltage and current for the Type C LED Tubes. A retrofit fixture label indicating the LED Tube and Driver used is provided to be applied to the fixture. Type C LED Tube and Driver solutions vary across the industry – they are not yet standardized like linear fluorescent lamps and ballasts.

There are also "hybrid" lamps that can cover multiple Types of LED Tubes, depending on how they are implemented.

Current offers a wide range of GE LED Tubes to replace linear fluorescent lamps, including all of the Types above. Each Type of LED Tube offers different advantages, so the right solution may vary by application.

Which LED Tube is right for you?

A basic comparison of the Types of LED Tubes is provided below. For more detailed information, please contact your Current sales representative.

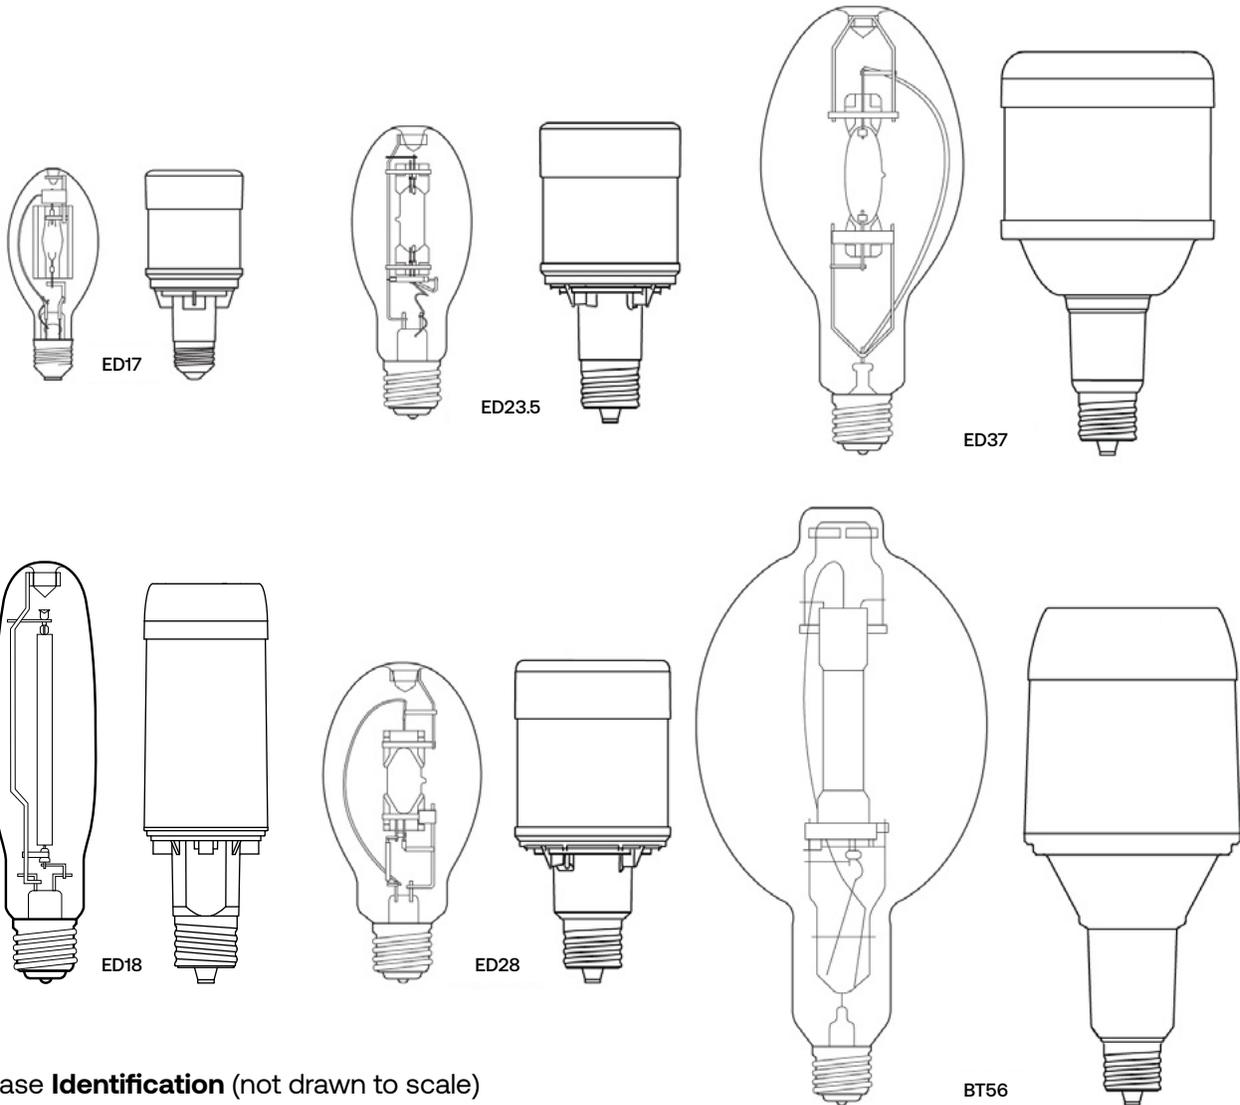

LED Lamps - HID

GE LED lamps for HID replacement utilize a proprietary design with active cooling, which allows for high output from a compact size. The length and diameter match HID ANSI profiles. These lamps feature omnidirectional light output, with similar distribution to traditional HID lamps. This enables GE LED lamps to fit in a variety of fixtures while providing equivalent light levels to HID. All of the GE LED lamps in this category are Type B, which means the fixture is re-wired to bypass the ballast.

¹ The life rating is based on the hours of operation the lamp will provide before reaching 70% of its original lumen output (L70)

² Minimum order quantity = Carton Qty

³ UL 1993 Environmental Requirements for LED LAMPS

⁴ Damp Location - Exterior or interior location that is normally or periodically subject to condensation of moisture in, on, or adjacent to electrical equipment, including partially protected locations

⁵ Not all product variations on this page are DLC qualified. Visit qpl.designlights.org/solid-state-lighting to confirm qualification.

⁶ Lumen levels correspond with color temperature for selectable lamps

* Default color temperature setting is 4000K for selectable lamps

⁷ Check ballast compatibility at LED.com/LED4pin-compatibility for G24q/GX24q lamps. Check ballast compatibility at LED.com/LED2G11-compatibility for 2G11 lamps.

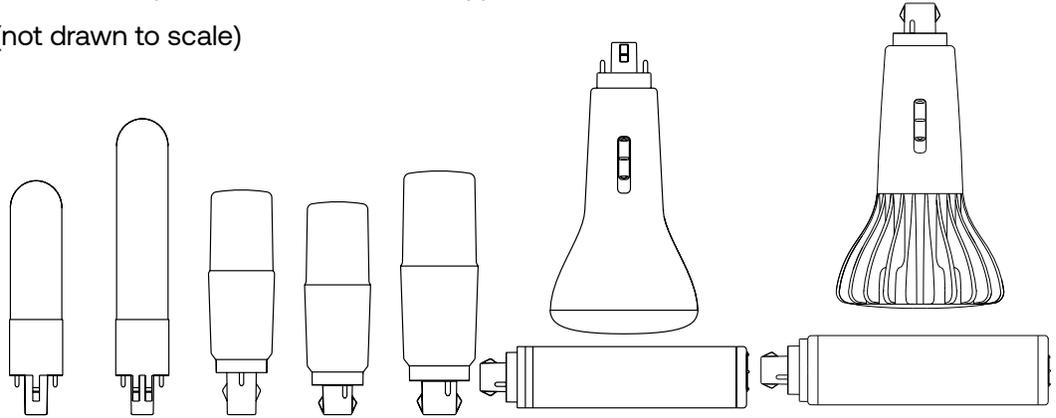

LED Lamps - Plug-in - Type B

LED Lamps – Type B Plug-ins

Type B LED plug-in lamps offer the opportunity to replace pin-based compact fluorescent lamps and eliminate costs related to the ballasts. Type B lamps operate from mains voltage. The fixture is re-wired to bypass the ballast. Horizontal and vertical orientation lamps are offered in order to minimize energy consumption and improve fixture efficiency. Choose the lamp orientation that suits the application.

LED Lamps - Directional

LED Lamps - PARs

Current offers LED PAR lamps featuring the exclusive Visual Comfort Lens design. With advanced optics and reduced glare, these lamps offer the light qualities desired by merchants for retail applications.

High output and value lines are also available to serve applications needing higher lumens or when advanced optics are not required.

LED Lamps – SpectraChoice™ A-Line Lamps (Dimmable)

SpectraChoice™ A-line dimmable lamps feature built-in switches to select color temperature. These lamps are offered in 40, 60, 75 & 100W incandescent equivalent lumen levels. Four lamps can cover the vast majority of A-line applications, providing a great opportunity to reduce inventory and simplify BOMs.

An indication of the ability of the lamp to render object colors in a normal natural way. The higher the number (0-100), the better the color appearance.

Color Temperature (K):
A measure of the visual "warmth" or "coolness" of the light from the lamp. The higher the value, the whiter or "cooler" the light appears.

Rated Life L70:
Hours of operation the lamp will provide before reaching 70% of its original lumen output

Dimmable:
Indicates whether a lamp is dimmable or not

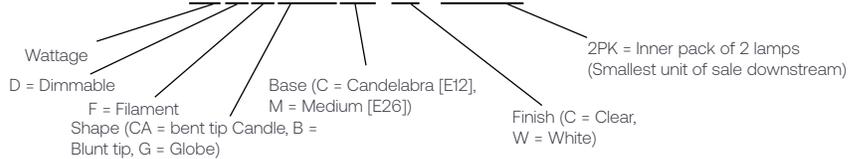

Location Rating:
Location Rating as defined for LED Lamps by UL 1993

Wattage Replacement:
Wattage of Traditional Lamp the LED Lamp is meant to replace

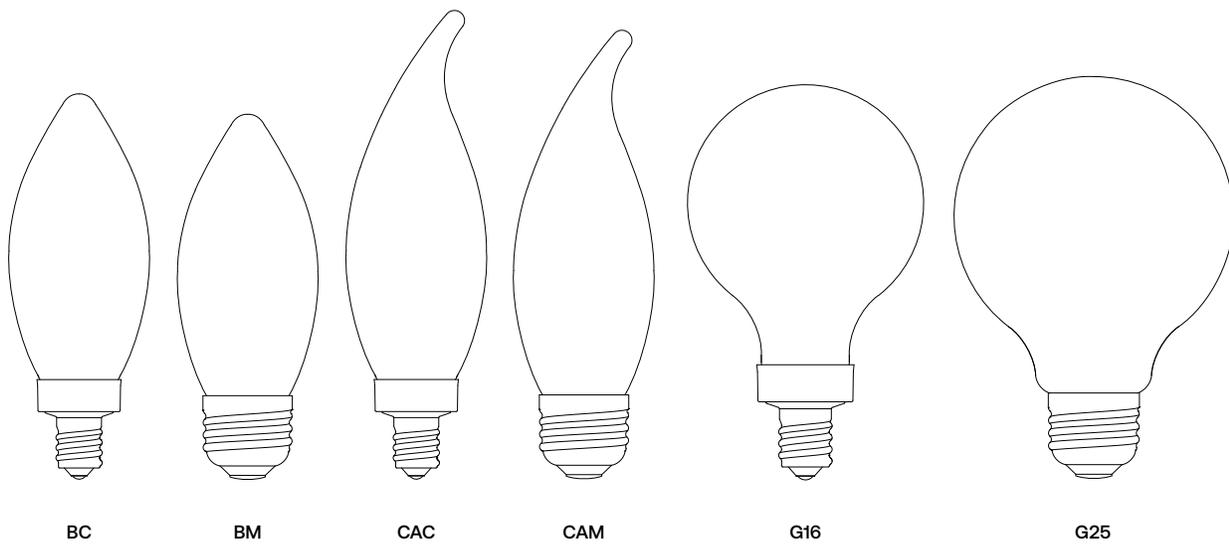

Additional Information:
Typical application and/or other important information

High Intensity Discharge Lamps

High Intensity Discharge lighting provides energy efficiency in a compact size for many commercial and industrial applications.

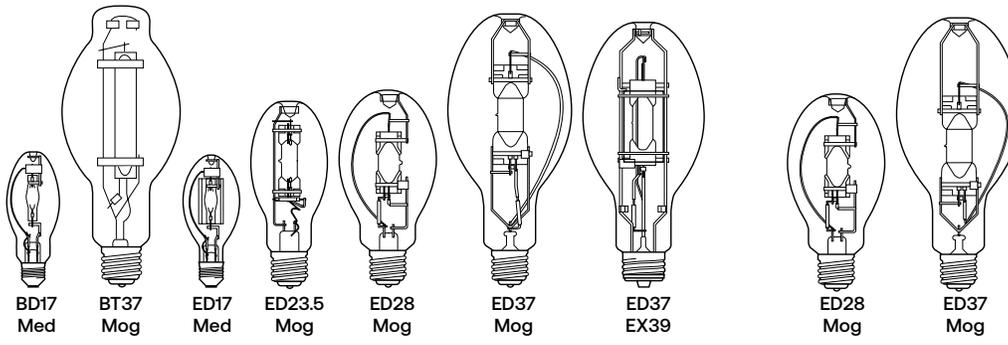

Reference Guide | Bulb Identification

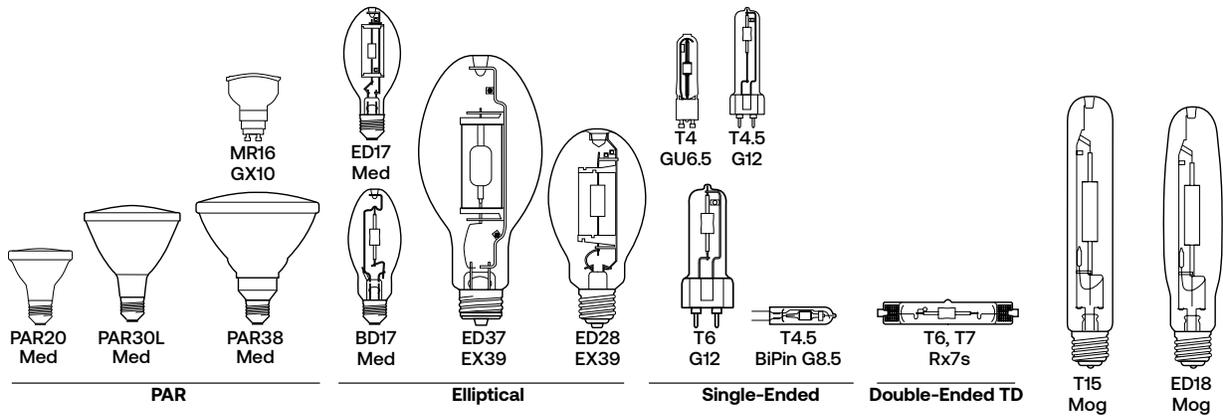

DIA: Diameter of bulb at widest point.
MOL: Maximum Overall Length including base or pins.
LCL: Distance between the center of the arc tube and the Light Center Length reference plane.
Note: Lamp drawings are not drawn to scale. Be sure to check size and dimension information when identifying each lamp.

To convert inches to millimeters, multiply the dimension (in inches) by 25.4 (i.e. 1.5" x 25.4 = 38.1 mm).

Filament Identification

Base Identification (not drawn to scale)

High Intensity Discharge Lamps

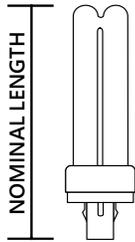

Compact Fluorescent Lamps

Compact Fluorescent lighting offers high light output and long life for all your commercial plug-in applications.

Reference Guide | Bulb Identification

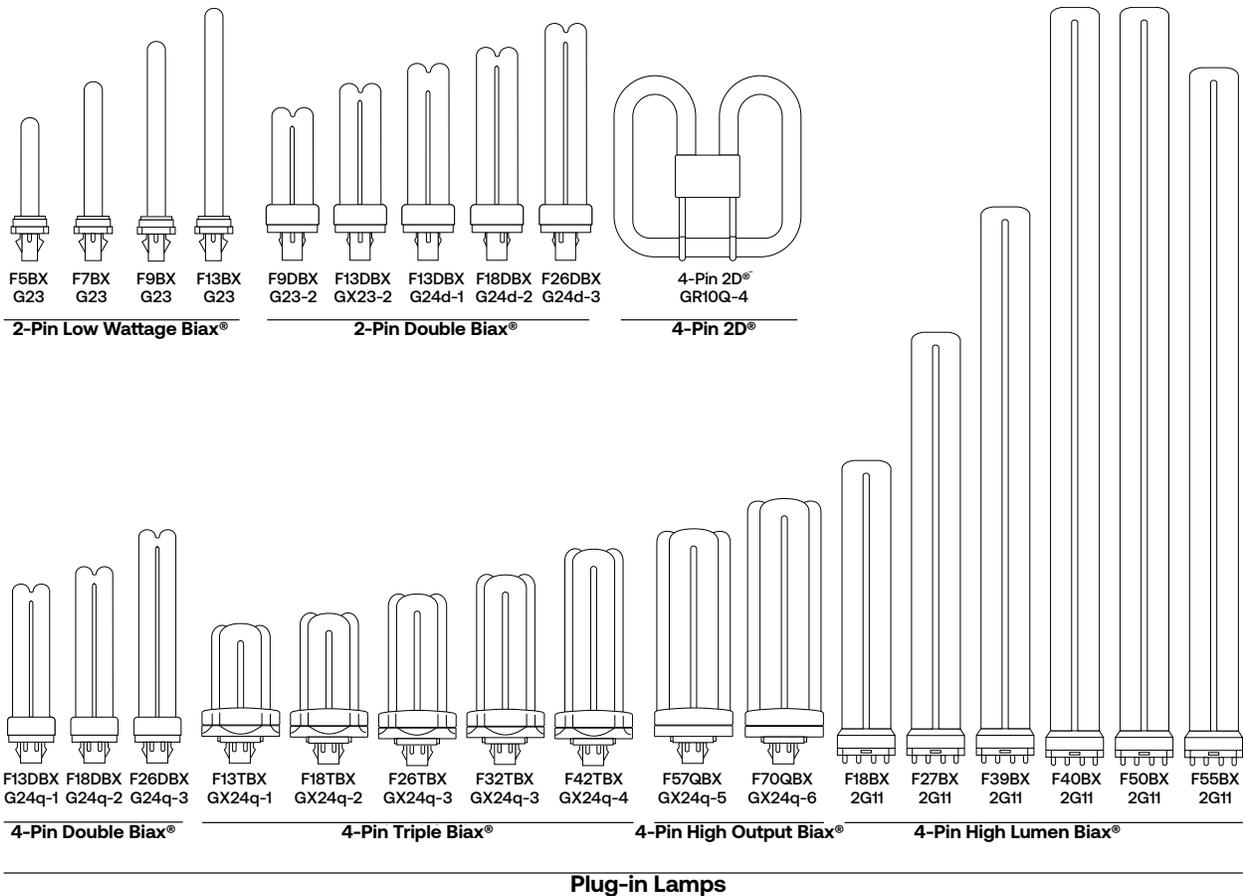

NOMINAL LENGTH:

Overall length including base or pins.

Note: Lamp drawings are not drawn to scale. Be sure to check size and dimension information when identifying each lamp.

To convert inches to millimeters, multiply the dimension (in inches) by 25.4 (i.e. 1.5" x 25.4 = 38.1 mm).

Electromagnetic HID Ballasts

Understanding Electromagnetic HID Ballasts

Current offers High Intensity Discharge (HID) ballasts for mercury, probe start metal halide, pulse start metal halide and high pressure sodium lamps. Standard metal halide lamps or probe start metal halide over 150 watts, like fluorescent, are electric discharge lamps and require an open circuit voltage of nearly two times the operating voltage to initiate the arc between the two electrodes in the arc tube. High pressure sodium, pulse start metal halide and probe start metal halide lamps 150 watts or less require an igniter to initiate the high voltage to start the lamps. The ballasts provide the starting voltage with the igniter, where required and provides stability for the lamp. HID lamps have negative impedance characteristics and would draw current until destruction unless a ballast was in place to regulate the current.

HID lamps take several minutes to warm-up and reach full light output. If power is interrupted between the lamp and the ballast, the arc will extinguish and lamp will go out. The lamp must cool down and reduce the vapor pressure before it will re-start. Typical warm-up and restrike times are as follows:

HID Ballast Types

Core and Coil

The most common HID ballasts are the core and coil and is used in 90% of the fixture applications. Core and coil ballasts consist of one, two or three copper (or aluminum) coils on a core of electrical-grade steel laminations. HID ballasts are classified by the kind of circuit they use: Reactor (R), High Reactance autotransformer (HX), Constant Wattage Autotransformer (CWA), Regulated lag (Reg Lag) or Electronic. HID ballast are also classified as high power factor (HPF) or normal power factor (NPF).

HID ballast 150 watts or less have High Reactance Autotransformer circuits and high power factor (HX-HPF). HID ballast greater than 150 watts have Constant Wattage Auto transformer circuits and are high power factor (HPF).

CWA ballast is the most common circuit for core and coil ballast. CWA circuits provide for stable light regulation. The CWA circuit consists of a high reactance autotransformer with a capacitor in series with the lamp resulting with high power factor ballast. In most CWA ballast circuits a 10% drop in line voltage will only reduce the light output and wattage by 5%. The CWA circuit ballast requires an igniter for QMH pulse start, ceramic metal halide and HPS lamps. Igniters are also required for QMH lamps 150 watts or less.

Linear Fluorescent Ballasts

Compact Fluorescent Ballasts

Understanding Compact Fluorescent Ballasts

Compact fluorescent (CFL) ballasts provide energy saving alternatives to halogen, incandescent or HID light sources. Multi volt ProLine® CFL programmed start ballasts combine universal voltage (108-305V) technology with multi-lamp capability, dual entry color-coded connectors and ultra system reliability to create an industry leading CFL solution for commercial and residential applications.

UltraMax® and UltraStart® High Lumen Biax® ballasts with the High Lumen WattMiser® Biax® lamp provides the perfect solution for high efficiency and high lumen output in a small space.

UltraMax® Instant Start Ballasts:

- For use in long burn cycles (>10 hr cycles) to maintain lamp life
- High efficiency (>90%) design
- Universal voltage (120-277V)
- Striation control circuitry
- Small compact housing

UltraStart® Programmed Start Ballasts:

- For use in shorter burn cycles (<3 hr cycles) to extend lamp life
- High efficiency (>90%) cathode cutout design
- Universal voltage (120-277V)
- Striation control circuitry
- Small compact housing
- Parallel lamp operation
- <700ms fast starting time
- Ballasts available for both F40/30W and F40/25W lamps

Multivolt ProLine®

Multivolt ProLine® CFL ballasts are offered in 3W configuration: 3-way mounting kits that allow you to have all three mounting options with one kit.

Multivolt ProLine® CFL ballasts come with a five-year ballast and one-year lamp limited warranty. These ballasts have a Consumer Class B EMI rating for residential applications, as well as a high power factor ballast design.

Use the Multivolt ProLine® CFL Multi-Lamp compatibility chart (page 17-3) to find the right ballast for your need.

ProLine® CFL Date Code System

Date Code Format: 01 200801 = Week2008 = Year

UltraMax® and UltraStart® Biax® ballasts have the same date code system as all linear fluorescent ballasts.
