RATIO FAMILY

Beacon Lighting provides comprehensive and coordinated solutions for a variety of exterior applications. A full line of luminaires are available with complementing shapes and styles that proportionally scale and add balance to the outdoor environment.

Quality construction and industry leading performance complete the package. Control options featuring photocontrols, occupancy controls and NX Distributed Intelligence™ enable optimum energy savings and customization.

VIPER FAMILY
VERSATILITY

DESIGN
The new Viper includes scalable Area and Flood designs capable of complementing contemporary or traditional architecture. Additional features such as multiple mounting options, replaceable power doors and an IP65 rating are standard offerings in this exceptionally versatile fixture.

PERFORMANCE
Each product is available with a variety of lumen outputs and distributions to satisfy a wide range of applications. Viper's scalability allows us to customize the output to meet specific design criteria. The precise beam control of the Viper helps reduce energy consumption and light trespass while providing high uniformity and visual acuity.

TECHNOLOGY
Simple or dynamic controls are available in every product configuration to give solutions for ever-changing code requirements and additional energy savings

VIPER AREA

VIPER BOLLARD

VIPER WALL

VIPER FLOOD

PERFORMANCE

VISUAL COMFORT
The Viper's unique optical design combines visual uniformity with the precise distribution of a Total Internal Reflection (TIR) optic. Five times the luminous surface area provides optimal light distribution plus visual comfort.

BACKLIGHT CONTROL
Less than 12% of the light emitted out of Micro Strike and Strike is thrown behind the pole, meaning 88% is utilized on application. That inherently means less energy is wasted on light that is not being used. For even greater backlight control, additional backlight control shields can be used to limit spill down to 5%.

IES comparison
The Viper Wall is available with three distinct distribution patterns to illuminate a variety of applications. Featuring Micro Strike Optics which maximizes target zone illumination with minimal losses at the house-side, reducing light trespass. In the illustration below, the Viper Wall luminaires illuminate the building perimeter and contribute substantial illumination to the parking area and drive lanes adjacent to the building.

AREA MICRO STRIKE OPTICS
Micro Strike optics are one of the optical choices available in the Viper. These optics have been specifically designed to replace HID luminaires with improved uniformity on application. This, combined with the high lumens per watt, makes Micro Strike the perfect choice for the most common applications.

Benefits
• Key distributions for every day applications
• High efficacy and lumens per watt
• Single piece optic provides more visual comfort
• Phosphor converted amber LED option
• Field rotatable for flexibility in mounting orientations
• Backlight control available to reduce light behind the pole

AREA STRIKE OPTICS
Strike optics are another optic choice that allow for maximized pole spacing, minimal backlight and provide specialty distributions for unique application requirements.

Benefits
• Specialty Distributions for unique applications or specification requirements
• Maximum Fixture Spacing
• Individual optics provide greater optical control
• True amber LED option
• Field rotatable for flexibility in mounting orientations
• Backlight control available to reduce light behind the pole

SPORT FIELD LIGHTING

TURF
SPORTS LIGHTER

Current

Standard yoke mounting with single 3/4" bolt. Yoke also includes vertical aiming indicators, adjustable in 5 degree increments. Fixture is 3G vibration rated.

Lumen outputs up to 114,000 lumens and 153 LPW give superior performance to legacy products and provide additional energy savings.

Visor and Laser aiming accessories available and can be field installed.
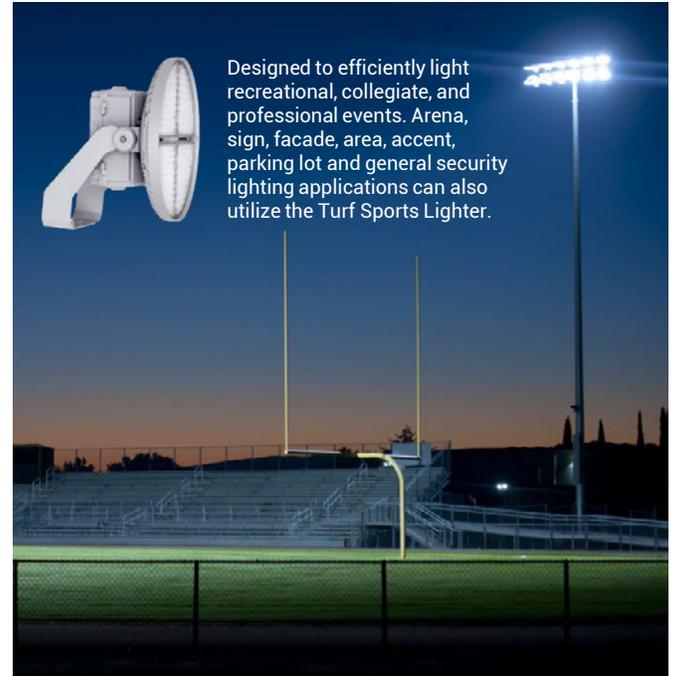

Designed to efficiently light recreational, collegiate, and professional events. Arena, sign, facade, area, accent, parking lot and general security lighting applications can also utilize the Turf Sports Lighter.

Retrofit Solution
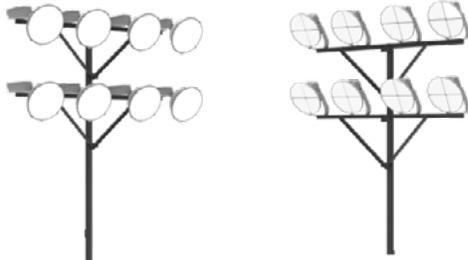

The Turf Sports Lighter is designed to replace 1500W HID products 1 for 1 and even has the capability of reducing fixture count which can result in more than 54% energy savings. This doesn't include additional savings from reduction in maintenance costs and sustained lighting levels. Upgrading your sports lighting has never been so easy!

KIM LIGHTING
PGL8

Category:
Wall Mount, Canopy & Garage

Lumen Range:
4,189 – 13,860 lm

Wattage Range:
50 – 150 lm

Nearly three decades ago, Kim Lighting set the bar for parking garage lighting with the introduction of the PGL. This innovative product was the first to offer an integrated, direct/indirect luminaire purposely designed for modern parking garage facilities.
This rich legacy of leading edge innovation and performance continues with PGL8. With an Edge-Lit Drop Lens, sleek form and a broad offering of control solutions, Kim Lighting raises the bar again for parking garage illumination.

PAVILION IMPACT
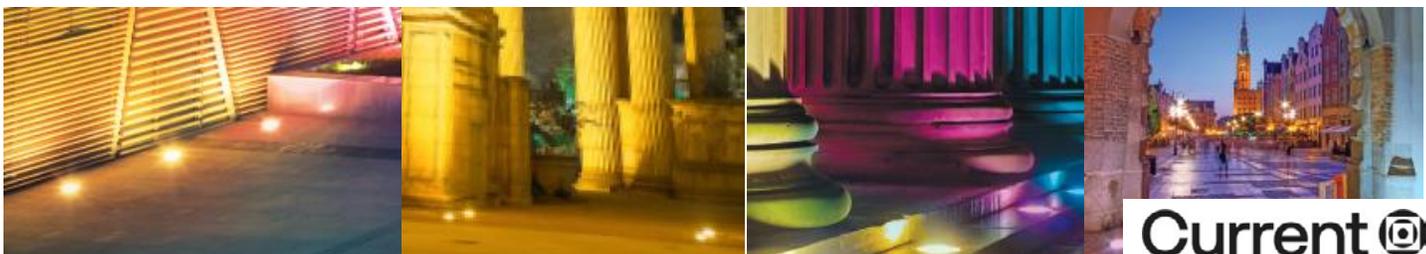

Lane Delineation for Cyclists
Marked bike lanes along the road are often not enough to keep cyclists safe. Impact bollards prevent motorists from crossing over into the bike lane while making a right turn or using them as parking lanes. Bollards used to delineate lanes requires drivers to sharing the roadway with cyclists and to stay in their own lanes.

Design
CONSIDERATIONS

Pedestrian Safety
Bollards can help guide traffic in congested areas such as parking lots to define traffic lanes and help the flow of traffic, demark entry and exit points, and provide protection to parking booths. A frequent application is using impact bollards in malls, shopping centers to prevent cars from jumping the curb to protect pedestrians foot traffic.

Traffic Barrier
Closely spaced lines of bollards can form a traffic barrier to separating vehicles from pedestrians, bicycles, wheelchairs, and strollers. Typical applications for parking lot entrance to a stores or malls, and at the intersection where streets have converted to outdoor malls or pedestrian walking ways.

Protection for Infrastructure
Impact bollards can be used to protect valuable infrastructure: electrical boxes, telephone switch boxes, water shut off valves, etc., keeping vehicles at safe distance. (Product above specified with RAL 1003 Signal Yellow)
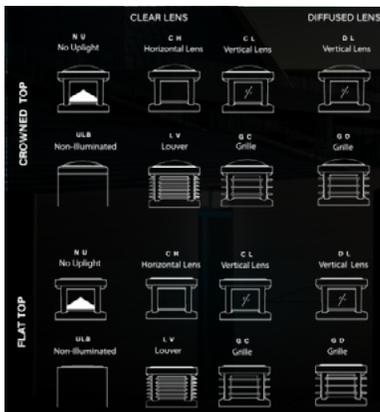

IMPACT RATED
Pavilion can be configured with louvers, grilles or choice of a clear or a diffused vertical lenses for increased vertical illumination with no glare at normal viewing angles and are optimized to deliver class-leading efficacy.

ENGINEERED EXCELLENCE
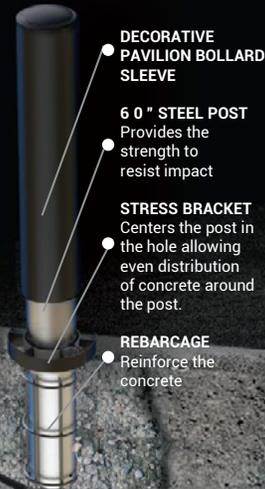

DECORATIVE PAVILION BOLLARD SLEEVE

6 0 " STEEL POST
Provides the strength to resist impact

STRESS BRACKET
Centers the post in the hole allowing even distribution of concrete around the post.

REBARCAGE
Reinforce the concrete

THE PAVILION IMPACT BOLLARD is being offered in two 44" models: non-illuminated (blind) or illuminated. The illuminated version offers all of the options available with the standard Pavilion: six distributions, seven optical options, crowned or flat top, optional RGBW color ring and control option. A matching 44" standard version is available to match the Impact bollard to blend seamlessly with the rest of the project.

CRASH RATED VS. SECURITY
Kim's impact bollard systems are full-scale crash tested by an independent accredited test agency to meet ASTM F3016 and proven safety solutions for stopping a 5,000-lb passenger truck at 10, 20, or 30 mph. These should not be confused with "engineered solutions" where calculations or finite element analyses are performed to estimate the bollard's performance. Full documentation is available showing these bollards have been real-world, dynamically tested to meet the rigorous criteria of ASTM F3016 and will perform as specified.

THE IMPACT BOLLARD meets the American Society for Testing and Materials (ASTM) S20 rated. The S20 rating from a nominal minimum test velocity of 20 mph with a permissible speed range of 19.0 to 27.4 mph for vehicles weighing up to 5000 pounds. This is the ideal solution for parking lots or walkway applications to protect pedestrians and property from errant vehicle traffic.

DISTRIBUTIONS

PAVILION is an architectural solution for any project that would like to provide safety to pedestrians and Property without the high security look. It can be configured for a wide range of applications:
- pedestrian
- walkways, crosswalks, bike paths, parking
- garages and mall parking lots. Pavilion
- delivers 5 IES distribution types: I, II, III, III
- with house side shield, IV, V

AREA & SITE

EVOLVE® EACL

The EACL expands the range of lumen packages down to 3,000 lumens. It is a cost-effective solution for exterior applications requiring below 20,000 lumens

EVOLVE® EALS

The EALS is ideal for commercial property site-lighting with various mounting options, up to 30,000 lumens and a robust design that allows flexibility.

EVOLVE® EALP

The EALP offers a variety optical and lumen packages, with three color temperatures and multiple mounting options for ultimate application flexibility.

EVOLVE® Sports Lighter (ESPL)

The Evolve ESP LED sports lighter is designed to replace legacy 1500W HID systems one-for-one.

DECORATIVE LED POST TOPS

EVOLVE® EPAM

The Evolve® EPAM Series LED Americana Post Top offers energy efficiency and quality of light in a classic, Acorn look and style.

EVOLVE® EPTT

The Evolve® EPTT Series LED Post Top - Town & Country offers energy efficiency, improved uniformity, and high quality of light with a classic open or refractor style.

EVOLVE® EPST

The Evolve® EPST Series LED Post Top - Salem offers energy efficiency, improved uniformity, and quality of light in a classic, utility carriage look and style.

EVOLVE® EPTC

The Evolve® EPTC Series LED Post Top - Contemporary Twin Support offers energy efficiency, and quality of light in your choice of two distinct, modern styles.

CANOPY & GARAGE
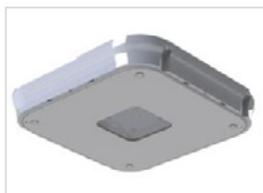

EVOLVE® ECLS

The ECLS offers energy efficiency and quality of light in a sleek low-profile look and style. Ideal for closed ceiling, drive thru and sidewalk applications.

EVOLVE® ECLP

The ECLP offers energy efficiency and quality of light in a sleek low-profile look. Suitable for wet locations, optimized for open canopy applications.

EVOLVE® EG2R

The EG2R features advance LED optic specifically designed for applications such as parking decks, with high uniformity and reduced glare it is ideal for safety.

FLOODLIGHTS

EVOLVE® EFC

The EFC Compact Flood Light is a replacement for 50W to 150W HID general purpose flood luminaires offering significant energy savings with a long-life LED light source.

EVOLVE® EFH

The EFH offers world class performance and durability. Ideal for traditional flood solutions like building facade, billboard, warehouse docks and freight yards.

EVOLVE® EFM

The EFM is our mid-lumen option for flood lighting built for durability. Ideal for general flood lighting and designed to replace up to a 400W HID fixture.

EVOLVE® EFMH

The EFMH is a medium output line of Hazardous Rated flood lights offering world class performance and durability for industrial, indoor or outdoor applications.

THE LINE
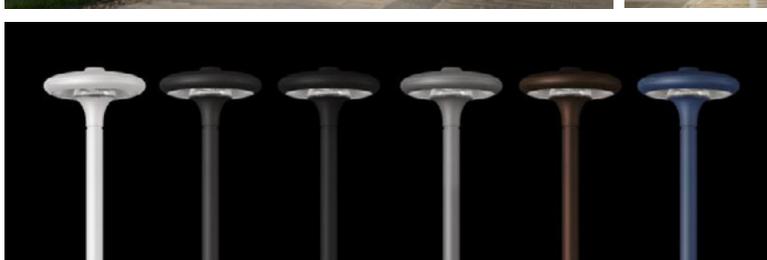

Self-cleaning through rainwater – following nature's example

Everything that doesn't work or is unnecessary is filtered out by nature. Following this maxim, Aya's farm emerged from its function – with minimal use of materials in order to conserve resources. The silhouette seamlessly integrates into urban and natural spaces thanks to its soft contours.

The organic farm of Aya allows rainwater to float across the entire luminaire housing, from top to bottom. This not only helps clean the luminaire but also improves the maintenance efficiency.

LINEAR LIGHTING | STRIP SERIES

High Power, RGB Outdoor
Great for enhancing outdoor spaces with a dynamic look. Suitable for hospitality, retail and commercial environments.

Applications
- Aisle and stairway lighting
- Cabinet and cove lighting
- Back lighting
- Showcase lighting
- Linear decorative lighting

High Power Outdoor
Exterior rated suitable for those commercial, retail and hospitality applications requiring higher illumination.

Applications
- Aisle and stairway lighting
- Cabinet and cove lighting
- Back lighting
- Showcase lighting
- Linear decorative lighting

High Power eStrip
The High Power LED eStrip is an advanced version that delivers twice the lumen output compared to the standard eSTRIP, enhancing illumination capabilities.

Applications
- Building outlines
- Coves
- Stairway and aisle lighting
- Signage
- Backlit panels
- Decks
- Edgelit glow
- Emergency lighting
- Pathway lighting
- Billboards
- Highlighting architectural features
- Over/Under cabinets

RGB eStrip
The RGB eSTRIP, featuring RGB LEDs, enables the creation of dramatic colour change effects, suitable for building outlines and architectural highlights.
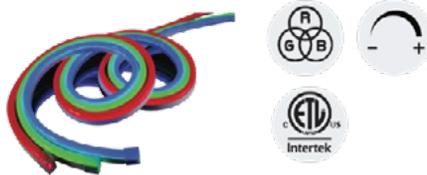

Applications
- Building outlines
- Coves
- Stairway and aisle lighting
- Signage
- Backlit panels
- Decks
- Edgelit glow
- Emergency lighting
- Pathway lighting
- Billboards
- Highlighting architectural features
- Over/Under cabinets

Neon Flex
LED Neon Flex is a flexible lighting solution designed to accentuate architectural and design elements, adding colour and vibrancy to building exteriors.

Applications
- Building outlines
- Stairway and aisle lighting
- Signs
- Decks
- Pathway lighting
- Billboards
- Highlighting architectural features

24V Wall Washer
The 24V LED Wall Washer is engineered for illuminating architectural features, signage, and landscapes with its advanced lighting capabilities. It provides a versatile solution for both indoor and outdoor spaces, combining functionality with aesthetic enhancement.

Applications
- Architectural lighting
- Signage
- Landscape lighting
- Exterior/interior commercial

Wall Washer 4' Enclosed
This a type of lighting fixture designed to evenly distribute light over a wall or vertical surface. Enclosed within a 4-foot-long casing, this wall washer is designed for durability and protection against dust, moisture, and other environmental factors.

Applications
- Architectural lighting
- Signage
- Landscape lighting
- Exterior/interior commercial
